

# Received the Clarivate Top 100 Global Innovator 2025

In March 2025, the NTT Group, including NTT and DOCOMO, was ranked among the "Top 100 Global Innovators 2025" by Clarivate (headquartered in London, UK).

Each year, Clarivate's Top 100 Global Innovators recognizes outstanding companies through a comparative analysis of global inventions based on its own patent database.

This accomplishment signifies that the inventions and achievements created through the NTT Group's research and development have gained global recognition.

To maintain the position, we will continue to conduct research and development on a daily basis, create inventions while securing their intellectual property rights, and share our innovation with the world.
