

Received the Clarivate Top 100 Global Innovator 2026

In January 2026, the NTT Group, including NTT and Docomo, received the "Clarivate Top 100 Global Innovators 2026" award, hosted by Clarivate (headquartered in London, UK).

The "Clarivate Top 100 Global Innovators" is an annual award presented by Clarivate. It identifies the top 100 most innovative companies worldwide by comparing and analyzing inventions from across the globe, utilizing proprietary patent-related data held by the company.

Receiving this award signifies that the inventions and achievements generated through the R&D efforts of the NTT Group are recognized on a global scale.

This marks the second consecutive year (and the 12th time in total) that we have received this honor. We will continue to conduct daily research and development, advance the pursuit of intellectual property rights for our inventions, and share innovation with the world.
