i-αppli

What is i-αppli?

By downloading i-αppli from i-mode sites, you can make full use of your FOMA phone supporting i-mode (i-mode phone). For example, you can enjoy various games downloaded to your i-mode phone, and can automatically check the stock prices at regular intervals once you have downloaded i-αppli for stock price information. In addition, you can download only the necessary data of map i-αppli so that you can scroll it smoothly. You can also use the i-αppli which enables you to directly store the data into the Phonebook or Schedule, or the i-αppli which links to Data Box, enabling you to save or obtain images.
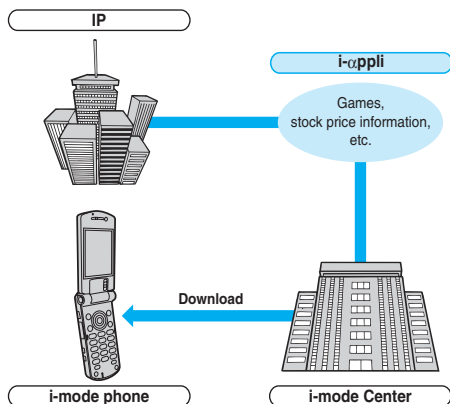

```
                    IP
```

```
                              i-αppli
```

Games,
stock price information,
etc.

Download

i-mode phone   i-mode Center

· The serial number of your i-mode phone/UIM may be used depending on the software.
· Some software programs do communication when they are started; you can set them not to communicate.

■Using stored data
Some i-αppli programs can refer to, store, and operate the data in your i-mode phone (Phonebook entries, bookmarks, schedule events, images and icon information).
The i-αppli programs can do followings by using the stored data:
· Store Phonebook entries   · Use icon information
· Save to Bookmark   · Store schedule events
· Retrieve images from Data Box   · Save images to Data Box
· Save ToruCa files   · Use miniSD memory card

What is i-αppli DX?

i-αppli DX enables you to use i-αppli in a more convenient and pleasurable way. By linking to i-mode phone's information (mail, dialed call records/received call records/redial items, and Phonebook entries), you can compose a mail message on the display where your favorite graphic character appears, or make the graphic character tell you who the caller of an incoming call is. By linking to mail, your desired information such as the stock price, or the progress of games can be updated in real time.

■Using stored data
Some i-αppli DX programs can refer to, store, and operate the data such as mail messages, redial items, received call records, and ring tones in addition to the stored data (Phonebook entries, bookmarks, schedule events, images, and icon information) which ordinary i-αppli can use. The i-αppli DX programs can do followings by using the stored data:
· Store Phonebook entries   · Refer to the Phonebook
· Use icon information   · Save to Bookmark
· Store schedule events   · Use Mail Menu
· Use the i-mode Mail Composition display   · Refer to the latest redial item
· Refer to the latest received call record   · Refer to the latest unread mail
· Save ring tones
· Change ring tones (for calls, mail, messages)
· Retrieve images from Data Box   · Save images to Data Box
· Change display settings (for the Stand-by display, Dialing/Receiving display, Mail Sending/Receiving display, Message R/F Receiving display)
· Use the miniSD memory card
· Store a new ToruCa file, or select or obtain ToruCa files
· i-αppli DX might do communication to confirm the validity of software regardless of the communication settings of the software. Communication frequencies and timing vary depending on the software.
· You need to set "Set time" to start up i-αppli DX.

What is Mail-linked i-αppli?

Mail-linked i-αppli is a type of i-αppli DX, enabling you to use i-αppli in a more convenient and pleasurable way. By exchanging information via i-mode mail, your desired information such as the stock price or the progress of games can be updated in real time.
· i-αppli mail running under mail-linked i-αppli may not be displayed correctly.

What is Osaifu-Keitai compatible i-αppli?

By using Osaifu-Keitai compatible i-αppli, you can read/write the data inside the IC card and use convenient functions such as downloading electronic money or traffic tickets, or checking your account for the balance and usage details on the mobile phone.
· If you use Osaifu-Keitai compatible i-αppli, the information on the IC card is transmitted to the IP (Information Provider) you have signed up for.
· See page 316 for Osaifu-Keitai.

Other things you can do

■i-αppli Stand-by display
You can set i-αppli for the Stand-by display so that you can receive mail or make calls from the i-αppli Stand-by display. You can also set the i-αppli Stand-by display more convenient; it enables you to display the latest information about news or weather forecast, or to bring up your desired graphic characters that notifies you of incoming mail or alarm. (See page 307)
● They are the functions that can be used under the software supporting the i-αppli Stand-by display.

■i-αppli auto start
You can auto-start the software programs by specifying the date, time, and the day of the week. Some software programs can be auto-started at the time intervals set in them. (See page 307)

■Shooting with a camera
You can take a picture using the i-mode phone's camera from the software.
● This is a function that can be used under the software supporting the camera shooting function.

■Infrared Exchange
With some software programs, you can communicate with the devices having the infrared exchange function. i-αppli now has a wide variety of usage by linking to those devices. (See page 359)
● This function can be used under the software which supports the infrared exchange function.
● You might not be able to exchange data with some devices, even when they have the infrared exchange function.

＊ You need to obtain a miniSD memory card separately to use the functions related to the miniSD memory card. (See page 351)

■**Infrared remote-controller**

With some software programs, you can operate various devices such as home electronic appliances supporting the infrared remote-controller. (See page 304)

For instance, you can use the pre-installed "Gガイド番組表リモコン (G Guide Program List Remote Controller)" as the AV remote controller that synchronizes with a TV program list. (See page 304)

● This function can be used under the software which supports the infrared remote-controller. You need to have the software compatible with target devices.

Downloading i-αppli from Sites

You can download software from sites to the FOMA phone.

You can store from 10 to 200 downloaded software programs. (The actual number of savable software programs may decrease depending on the data size.)

1 Bring up an i-αppli downloadable site▶Select a software program▶ ⊙

2 Press ⊙ when downloading ends.

● When downloading ends, the display for Software Setting (Network Set, Stand-by Set, or Stand-by Net) might come up. Press ✉ (Finish) after setting is completed. These settings can be done also from the Software List.

3 YES or NO

YES . . . . Launches i-αppli.
NO . . . . . Returns to the site display.

● When software launches, " α " or " dc " appears at the lower part of the display.

■**When software programs are stored to the maximum**

When the maximum number of software programs is stored or there is not enough memory, the confirmation display appears asking whether to delete unnecessary software programs to save new ones.

1. YES▶Put a check mark for the software programs to be deleted
   ▶ ✉ (Finish)▶YES
● " ☐ " and " ☑ " switch each time you press ⊙ .
● Continue checking items until " Finish " appears at the lower left of the display.
● See page 299 for deleting mail-linked i-αppli.
● Software is not saved if downloading fails because of radio wave conditions.

■**Downloading mail-linked i-αppli**

When you download mail-linked i-αppli, each i-αppli mail folder is created automatically in the Inbox/Outbox Folder List. The name of the folder is the same as the title of the downloaded mail-linked i-αppli, and cannot be changed.

You can save up to five mail-linked i-αppli programs.

● You cannot download the software if the mail-linked i-αppli using the same folder is already in the Software List.
● You cannot download mail-linked i-αppli while Mail Security is set.
● You cannot download mail-linked i-αppli if the Inbox/Outbox Folder List contains five i-αppli mail folders.

■**Reloading mail-linked i-αppli**

You can use an existing i-αppli mail folder when downloading mail-linked i-αppli whose folder only remains. If you do not use the existing i-αppli mail folder, delete the folder and create a new i-αppli mail folder. You cannot download mail-linked i-αppli without creating a new folder.

To use the existing i-αppli mail folder
1. The confirmation display asking whether to use the folder▶YES

To delete the existing folder and create a new i-αppli mail folder
1. The confirmation display asking whether to use the folder▶NO
2. The confirmation display asking whether to create a folder▶YES

Information

● "i-αppli mail" is the mail sent and saved by mail-linked i-αppli and mail received for mail-linked i-αppli. i-αppli data is set for i-αppli mail so that i-αppli mail is automatically saved to the i-αppli mail folder.

Display Software Info

Setting at purchase	Not display

You can display software information when downloading i-αppli.

1 ⊂⊃ ▶ 🔧 SETTINGS ▶ αppli settings ▶ Disp. software info ▶ Display or Not display

<i-αppli Launch>

Starting i-αppli

1 Stand-by display ▶ 🔳 (for at least one second) ▶ Select the software to be launched ▶ ⊙

αppli activating

- You can display the Software List also by ⊂⊃ ▶ 🔳 i-αppli ▶ Software list (phone).
- You can display the Software List inside the miniSD memory card by ⊂⊃ ▶ 🔳 i-αppli ▶ αppli (miniSD) ▶ SW list (miniSD).
- If you have set "Software setting (Network set)" to "Check every start", the confirmation display might appear asking whether to use network communication. Select "YES" or "NO".
- The confirmation display appears asking whether to allow the i-αppli DX to use the FOMA phone's information and functions while i-αppli DX is being launched or running. Select "YES" or "NO".
- " 🄩 " or " 🄳🄺 " is displayed while i-αppli is running.
- To end i-αppli, press and hold 🔁 for at least one second or press 🔴; then select "YES".

Bring up IC Card List

You can bring up the Osaifu-Keitai compatible i-αppli list.

1 ⊂⊃ ▶ 🔳 LifeKit ▶ IC card content

IC Card List

- Select a software program and press ⊙ to launch it.
- The software program launched last time comes at the top of the list. You cannot manually change the order of software programs.

■**To launch another software from the current software**
With some software programs you can launch the specified i-αppli programs and enjoy them without returning to the Software List. For some software programs, the software programs to be launched has been specified, and for others not.

When software to be launched is specified
While i-αppli is running, the confirmation display appears asking whether to launch specified software. Select "YES".

When software to be launched is not specified
When software to be launched is not specified, you need to select the software. While i-αppli is running, the confirmation display appears asking whether to select software. Select "YES", select the software and press ⊙ .

>**Information**
>
> ● If the specified software is not in the Software List, you need to download it.

■**When software malfunctions**
You can check the details when software malfunctions.

1. (▲) ► [i-αppli icon] ► [icon] αppli info►Trace info

The display for Trace Information comes up.

■**When a security error occurs**
You can check the details when i-αppli ends because of a security error. If " [icon] Error " is displayed on the desktop, you can select the icon and press ⊙ to display the Security Error History.

1. (▲) ► [i-αppli icon] ► [icon] αppli info►Security error history

The display for Security Error History comes up.

■**When " FUNC " appears on the Trace Information or Security Error History display**
You can copy information by pressing ⊛ (FUNC) and selecting "Copy info". To delete information, select "Delete info", and select "YES".

>**Information**
>
> ● When there is no Trace Information, "Trace info" is not displayed.
> ● When the memory space for the Trace information becomes full, the information is overwritten from the oldest one.
> ● To creators of i-αppli
>   If you encounter an error while creating software, the Trace Information display might help identify the problem.
>   See "■When software malfunctions" for how to check the Trace Information.

>**Information**
>
> ● Set the date and time of the clock beforehand by "Set time" for i-αppli DX to run.
> ● You can receive mail and Messages R/F while i-αppli is launching or running. i-αppli will continue and the icon " [icon] ", " R " or " F " will be displayed. To check mail or messages you have received, close i-αppli or use the Multitask function.
> ● When software is running, melodies will be played at the volume set for "Phone" of "Ring volume". However, melodies are not played during a call.
> ● You may need to set the communications setting while the software is running.

>**Information**
>
> ● When communicating frequency is extremely high in a certain period of time while running i-αppli, the confirmation display appears asking whether to continue communicating. Select "YES" to continue communicating. When you select "NO", communicating ends but i-αppli continues running. Select "End" to close i-αppli. When you select "NO" and try to re-start communicating, the confirmation display appears whether to start communicating. Select "YES" or "End".
> ● If a call comes in while i-αppli is running, i-αppli will be interrupted temporarily. The i-αppli display returns when you end the call.
> ● With some software programs you can use the Web To function and the Phone To/AV Phone To function from i-αppli.
> ● If i-motion movie (image and sound data) is played back while i-αppli is running, see page 337 for operation instructions. The i-αppli display returns when you cancel playback.
> ● If the camera is launched from i-αppli, the shot images are not saved with ordinary images, but are saved as part of i-αppli for its usage.
> ● If you launch a camera from i-αppli, you can specify the image size or image quality for some i-αppli programs.
> ● You can scan QR codes and JAN codes from i-αppli using the camera. The scanned data is saved and used by the software.
> ● Images※ that are used by i-αppli and data you have entered can be sent over the Internet to the server automatically.
>   ※i-αppli uses the following types of images:
>   · images taken by the camera after it is launched from a camera-linked i-αppli
>   · images obtained by the infrared exchange function of i-αppli
>   · images downloaded from sites or Internet web pages
>   · images obtained from Data Box by i-αppli
> ● i-αppli mail running under mail-linked i-αppli may not be displayed correctly.
> ● At i-αppli launch, the confirmation display might appear asking whether to upgrade the software to the latest one. Select "YES" or "NO". (See page 299)
> ● Some programs of i-αppli software save the various information running under i-αppli when you finish it. However, the information might not be saved if the battery alarm sounds or the battery pack is removed while i-αppli is running. If the battery level indicates " [icon] ", either press [PWR HLD] or end i-αppli in accordance with the instructions from each software.
> ● You can save some software programs to the miniSD memory card. You can check " [icon] αppli (miniSD)" for whether a software program is available to the miniSD memory card.
> ● Data saved to the miniSD memory card might not be available on other models.
> ● Some IPs (Information Providers) may access the software stored in your mobile phone and have directly that software suspended, depending on the software. In that case, you will not be able to launch or update the software, or use it for the Stand-by display. You can delete the software or to display the software information. To resume running the software, you need to receive the communication to cancel the software suspension. Contact the IP (Information Provider) to inquire about that.
> ● Some IPs (Information Providers) might send data to the software stored in your mobile phone depending on the software.
> ● When the IP (Information Provider) requests to halt or re-open the software or sends data to the software, the mobile phone communicates and " [icon] " is displayed. In this case, you are not charged the communication fee.

Information

● The software launched last is displayed on the first line. You cannot sort the order of the software programs manually.

Function Menu of the Software List/ IC Card List

1 **Software List/IC Card List▶ (FUNC)**
▶Do the following operations.

Function menu	Operation/Explanation
Set 冫αppli To	You can set whether to launch i-αppli from sites or mail. You can also set whether to launch i-αppli when you place the FOMA phone over an IC card compatible scanning device (reader/writer). You can set this for each software. **▶Put a check mark for the items to be set** **▶ (Finish)** Site " 冫αppli To" . . . . Launches i-αppli from the site containing links for launching i-αppli. Mail " 冫αppli To" . . . . Launches i-αppli from the mail message containing links for launching i-αppli. Ir " 冫αppli To" . . . . Launches i-αppli from the external device by receiving infrared data for launching i-αppli. Bar code " 冫αppli To" . . . . Launches i-αppli from the bar code for launching i-αppli. IC-Card " 冫αppli To" . . . . Launches i-αppli from the IC card. ● "☐" and "☑" switch each time you press ⏺. ● Some items might not be set depending on the software.
Auto start time	You can set the date and time for Auto Start. (See page 307)
Software setting (Stand-by set)	You can set the software as the i-αppli Stand-by display. (See page 307)
Software setting (Network set)	You can set whether to communicate while i-αppli is running. **▶Network set▶ON, OFF or Check every start** ● If you select "Check every start", you can check whether to permit the i-αppli to connect to the network each time you launch it. **▶ (Finish)**
Software setting (Stand-by net)	You can set whether to communicate while the i-αppli Stand-by display is running. (See page 308)
Software setting (Icon info)	You can set whether to permit the i-αppli to use information of icons for the i-mode mail, SMS messages, Messages R/F, battery level, Manner Mode and for service area/out of service area. **▶Icon info▶ON or OFF▶ (Finish)**

Function menu	Operation/Explanation
Software setting (Change mld./img.)	You can set whether to permit the i-αppli to change the setting for ring tones or the Stand-by display. This function is available only for i-αppli DX. ▶**Change mld./img.**▶**ON, OFF or Check every change** ●If you select "Check every change", you can confirm whether to permit i-αppli to change the settings for ring tones and Stand-by display each time. ▶⊠ (Finish)
Software setting (See P.book/hist.)	You can set whether to permit the i-αppli to refer to the Phonebook, Redial, and Received Calls. This function is available only for i-αppli DX. ▶**See P.book/hist.**▶**ON or OFF** ▶⊠ (Finish)
Software setting (View ToruCa)	You can set whether to permit the i-αppli to refer to the ToruCa file. This function is available only for i-αppli DX. ▶**View ToruCa**▶**ON or OFF**▶⊠ (Finish)
Software desc.	You can display the software name and version of the i-αppli. ●Use 🔘 to scroll the display to check the information.
Upgrade	You can upgrade the version of the software. ▶**YES**
Add desktop icon	You can paste the software to the desktop. (See page 165)
Delete	▶**YES** ●A confirmation display appears asking whether to delete for the software that has been set as the Stand-by display or set for Auto Start.
Delete selected	▶**Put a check mark for the software programs to be deleted**▶⊠ (Finish)▶**YES** ●"☐" and "☑" switch each time you press 🔘. You can check or uncheck all items by pressing 🔘 (FUNC) and selecting "Select all/Release all". ●If there is the software that has been set as the Stand-by display or set for Auto Start, the confirmation display appears asking whether to delete the software.
Delete all	▶**Enter your Terminal Security Code**▶🔘 ▶**YES** ●If there is the software that has been set as the Stand-by display or set for Auto Start, the confirmation display appears asking whether to delete the software.
Move to miniSD	You can move the software to the miniSD memory card.
Move to UIM	You can move the software from the miniSD memory card to the FOMA phone.

Information

<Software setting (Icon info)>
●When you set "Software setting (Icon info)" to "ON" for the i-αppli Stand-by display, the icon information for unread mail/message, battery level, Manner Mode, radio wave strength and out of service area can be sent to the IP (Information Provider) over the Internet in the same way as the serial number of your mobile phone/UIM, and can be deciphered by third parties.
●When the software needs "Software setting (Icon info)", the software might not run if "OFF" is selected.

Information

<Software desc.>
●You cannot change the name of the i-αppli software displayed in "Software desc.".

<Upgrade>
●When the software has been updated at launching, you can automatically update that software.
●When there is not enough memory, the confirmation display appears asking whether to delete unnecessary software programs and save new ones. (See page 295)
●At upgrading, the confirmation display might appear asking whether to send the "serial number of your mobile phone/UIM". Select "YES" to start updating. In this case, the "serial number of your mobile phone/UIM" is sent to the IP (Information Provider) over the Internet, so could be deciphered by third parties. However, your phone number, address, age, and gender are not notified to the IPs (Information Providers) by this operation.
●You cannot update the mail-linked i-αppli in the following cases:
・While details of the corresponding i-αppli mail folder are displayed
・While Mail Security is set
・When Mail Security is set for the corresponding i-αppli mail folder

<Move to miniSD>
●On other models, you might not be able to launch the software that was moved to the miniSD memory card.

■**When you delete mail-linked i-αppli**

When deleting mail-linked i-αppli, you can select whether to delete the automatically created i-αppli mail folders. If just the folders are left, you can check the text of mail from the Inbox/Outbox List.

For "Delete"

1. Do the operation for "Delete", "Delete selected" or "Delete all".
   YES . . . . . . Deletes both the software program and the i-αppli mail folder.
   NO . . . . Does not delete the i-αppli mail folder; deletes the software only.
   Cancel . . . . Does not delete both the software and i-αppli mail folder; the former display returns.

Information

●When the i-αppli mail folder contains protected mail, you cannot delete both the software and the folder even if you select "YES".
●You cannot delete the i-αppli mail folder in the following cases:
・While displaying details of the folder
・While Mail Security is set
・While the folder is set with security
・When the folder contains protected mail

i-αppli

i-αppli Launch

299

■When you delete an i-αppli program whose data files are on the miniSD memory card

When you delete an i-αppli program whose data files are on the miniSD memory card, you can select whether to delete those files.

1. Perform the operation of "Delete", "Delete selected", or "Delete all".
YES . . . . . . Deletes both the software and files on the miniSD memory card. Press "YES" again on the confirmation display. You need to enter your Terminal Security Code to execute "Delete" or "Delete selected".
NO . . . . Does not delete the files on the miniSD memory card but deletes the software only.
Cancel . . . . Does not delete both the software and files on the miniSD memory card, and the former display returns.

■When you delete Osaifu-Keitai compatible i-αppli
When deleting the Osaifu-Keitai compatible i-αppli, the confirmation display appears asking whether to delete the data on the IC card. Select "YES".

Information

● You might not be able to delete the Osaifu-Keitai compatible i-αppli unless you delete the data inside the IC card after launching the Osaifu-Keitai compatible i-αppli.
● You might not be able to delete the Osaifu-Keitai compatible i-αppli while the IC card function is working or IC Card Lock is set.

■Setting of pre-installed i-αppli software

Pre-installed i-αppli Software

The following i-αppli programs are pre-installed:

- You can delete i-αppli programs pre-installed in your FOMA phone. You can re-download the deleted i-αppli programs from the "P-SQUARE" site.
  If you use the UIM other than the one used for downloading, the UIM restrictions are activated. (See page 41)
- The re-download service is scheduled to close on April 30, 2010 for "2006 FIFAワールドカップ ドイツ大会 (2006 FIFA World Cup Germany)" and on May 31, 2010 for other i-αppli programs.
- The download service of additional data for i-αppli programs is scheduled to close on May 31, 2010 for "2006 FIFAワールドカップ ドイツ大会 (2006 FIFA World Cup Germany)" and on June 30, 2010 for "ソニック・ザ・ヘッジホッグ2 (SONIC THE HEDGEHOG 2)", "ドットクリエイター (Dot Creator)", "ケータイコーディネーター (Mobile Phone Coordinator)", and "ポケメ〜ト(Poké-mate)".
- The re-download service and download service of additional data for i-αppli programs might be halted or closed without notice even in the service period.

2006 FIFA ワールドカップ ドイツ大会 (2006 FIFA World Cup Germany)

People in Japan and all over the world keep their eyes on the soccer festival held every four years "FIFA World Cup".
You can enjoy playing the most impressive, exciting soccer game of the century.

ソニック・ザ・ヘッジホッグ2 (SONIC THE HEDGEHOG 2)

© SEGA

Operate Sonic to prevent a mystic jewel "Chaos Emerald" from being stolen and the universe being conquered by Dr. Eggman who is trying to.

●This game consists of multiple stages, and only the first two stages are stored at the time of your purchase. When you complete the second stage, you can download the consecutive stages. You can download them also from "P-SQUARE" site.

1 **Software List▶ソニックザヘッジホッグ2 (SONIC THE HEDGEHOG 2)▶** ⊙

●When " ♪≪≪ " appears at the lower left of the display, press ✉ to adjust the sound volume.

2 **Select a menu▶** ⊙

ゲームスタート (Game start)
. . . . Select "最初から始める (From the start)" or "ステージセレクト (Stage select)".
Select "ステージセレクト (Stage select)" to select a stage and start the game. When there is any saved game, you can select "途中から始める (Continue)".
ゲーム説明(Game's explanation)
. . . . Explains the game outline and operation.
ランキング (Ranking)
. . . . Browse rankings and high scores.
オプション (Option)
. . . . Adjust the level of the game and sound volume.

■Key operation while playing a game

When Sonic comes in contact with an enemy with his body rolled up, such as when making revolving jump or spinning, he can knock the enemy down.
●Some enemies cannot be knocked down unless specific parts of the body are hit.

Key operation	Contents
⊙ (2ABC)	Makes revolving jump.
⊙ (8TUV)	Squats/Spins (during dash).
⊙ (4GHI)	Moves to the left/Dashes.
⊙ (6MNO)	Moves to the right/Dashes.
⊙ (5JKL)	Looks up.
⊙ (8TUV)+ ⊙ (5JKL)	Spins and Dashes.
ⓘⓡ	Break/Resume.

■Save

Press ⓘⓡ during a game and select "セーブして中断 (Save and suspend)" from the Break display to save the game. The game is automatically saved when the battery runs out or when the software is closed.

●"セーブ (Save)" stores the data for when ACT is cleared. If you have not cleared any ACT since you started playing the game, the saved contents are not changed even if you select "セーブして中断 (Save and suspend)".

■Continue

When the game is over, the Continue display appears. To restart the game from the beginning of the stage (ACT) where the game was over, press ⊙ within 10 counts.

Information

●When you move to the next stage, the confirmation display appears asking whether to launch the specified software. Select "YES" to proceed to the next stage.
When the next stage has not yet been downloaded, the display to the effect that downloading is needed appears. Select "OK" and then "YES" to download the next stage. After you complete downloading, you can proceed to the next stage.

. . . Register your profile, perform other settings, and change your mail address.

Gガイド 番組表リモコン (G Guide Program List Remote Controller)
※The display is for reference. The actual one differs. Local programs according to your region appear on your display.

This is a convenient i-αppli software program that bundles the TV program list and AV remote controller function and the monthly charge is free. Anytime and anywhere you are, you can easily download terrestrial analog or terrestrial digital TV program information. You can know about titles, contents, and start/end times of TV programs. If there is any program you want to watch, you can reserve recording of the program on a DVD recorder over the Internet. (You need to have a DVD hard disk recorder that supports the remote recording reservation function. And you need to perform initial settings of this i-αppli program.) Further, you can search for the program information by keywords such as program genres or celebrities you like. You can also remote-control a TV, video recorder, and DVD player. (Some models are not supported.)

● You need to perform the initial settings and to agree with the usage rules for the first time.
● You are charged packet communication fee.
● To use this i-αppli program overseas, set the date/time for your FOMA phone to Japan time.
● For details, see "i-mode User's Manual".

■**About remote recording reservation function**

If you have a DVD recorder that supports the remote recording reservation function, you can reserve recording from the program list of this i-αppli program over the Internet even if you are away. For remote recording reservation, you need to perform initial settings of this i-αppli program.

How to perform initial settings
1. Perform settings to connect the DVD recorder to the Internet. (Refer to the instruction manual of the DVD recorder you use.)
2. Software List▶Gガイド番組表リモコン (G Guide Program List Remote Controller)▶(⑫α) (メニュー)▶Remote recording reservation ▶Operate following guidance.

How to reserve programs
After the initial settings, specify your desired program and select "リモート録画予約 (Remote recording reservation)". Then, the DVD recorder specified on this i-αppli program is connected via the Internet, and you can reserve the program recording.

※When a program has already been reserved for the same time, the message to that effect appears on the Program List.

● You are charged packet communication fee.

■**Infrared remote-controller**

Within ±15° from the center

Within 4 meters

Infrared data port
You can use the FOMA phone as a remote-controller for devices supporting infrared remote-controllers. i-αppli makes use of infrared rays to let the FOMA phone send remote control signals.

● To use remote control devices, you may need to download the software for those devices. The key operation for the remote-controller differs depending on the software.
● This function does not work with some devices.
● Communication might be affected by compatible devices and the ambient light.
● You cannot use infrared remote-controller during Self Mode.
● Aim the FOMA phone's Infrared data port at the front of the device to be operated.
You can operate up to 4 meters away from the device.
● Keep the angle of the infrared rays within ±15° from the center.

電子マネー「Edy」
(Electronic Money "Edy")

Electronic Money "Edy" is a prepaid type of electronic money service that is easy-to-use for anybody. Electronic Money "Edy" is a service provided by bitWallet Inc. At using "Edy", make sure you read the cautions and contractual clauses and then proceed to the initial settings.

Information

● You are charged packet communication fees for using i-mode communications such as "Initial settings", or "Main menu" functions of i-αppli.
● The current FOMA phone can be used just like the Edy card even after you replace it with a new model, so be careful when you discard it.
● When you set "Network set" of "Software setting" to "OFF" or activate "Self mode", you cannot execute "Initial settings" or operate the "Main menu" functions of i-αppli as you cannot use i-mode communications.
● You need to receive the mail message for starting the settlement of accounts from the Edy center for Mobile Edy (payment over the Internet) to be available; therefore, if you have set to reject receiving mail messages over Internet by Spam Mail Prevention (Reject/Receive Mail Settings), be sure to add "bitwallet.co.jp" as one of the domains.
● Note that we cannot be held responsible for the information you have specified in the FOMA phone.

ケータイクレジット「iD」
(Mobile Phone Credit "iD")
※The display is for reference.
　The actual one may differ.

Mobile Phone Credit "iD" is a credit service that enables you to do shopping or cashing by placing your Osaifu-Keitai over a reader. You can do shopping very easily without taking a card out of your wallet or without signing in.

- To use "iD", you need to subscribe to your card publishing company that supports "iD", and to have iD αppli and card αppli provided by that company.
- To launch iD αppli for the first time, you need to agree with "ご利用上の注意 (Cautions in use)", to get ready for use, and then to download card αppli.
- The expense (annual fees, etc.) charged for the credit service that supports "iD" varies depending on the card publishing company.
- You are charged a packet communication fee for downloading iD αppli, and card αppli of the credit card publishing company.
- For details, refer to "i-mode User's Manual".
- For the information about "iD", refer to the iD web page and i-mode site.
  Web page . . . http://id-credit.com

Information

● Software does not start automatically in the following cases:
· The FOMA phone is switched off
· The date and time are not set
· Another function is working
· During Lock All or PIM Lock
· While animation/Flash movie is being played back
· The time set for automatic start is identical to the reserved time set for "Software update", or the time set for an alarm of "Alarm", "Schedule" or "ToDo"
· While "Automatic display" is set
· When a launch time has been specified to the same software within 10 minutes from the previous auto-launch
● If automatic start fails, " α Not run " appears on the desktop. Select the icon and press ● to bring up the Auto Start Info display.

<i-αppli Stand-by Display>

Operating i-αppli Stand-by Display

Software Setting (Stand-by Set)

You can set i-αppli for the Stand-by display. Once set, the i-αppli Stand-by display automatically appears each time you bring up the Stand-by display.

1 **Software List/IC Card List▶** 📷 (FUNC)
▶ **Software setting▶Stand-by set**

ON. . . . . . . **Sets the i-αppli Stand-by display.**
OFF. . . . . . **Releases the i-αppli Stand-by display.**

2 **Press** 🖂 (Finish).

" 🕂 " is displayed for the software set as the Stand-by display. " 🕂 " or " 🕂 " is displayed while an i-αppli Stand-by display is running.

■**To operate i-αppli as a normal i-αppli when an i-αppli Stand-by display is running**

From the i-αppli Stand-by display, press ⌨.
" 🄲 " or " 🄲 " changes to a blinking " 🄲 " or " 🄲 " and then you can operate the i-αppli normally.
● To return to the i-αppli Stand-by display, press and hold ⌨ for at least one second or press 🔘; then select "Ended". To release the i-αppli Stand-by display, select "Terminated", and select "YES".

Information

● With some software programs set as the i-αppli Stand-by display, you can press a key to go from the normal i-αppli status to the i-αppli Stand-by display status. However, you cannot return to the i-αppli Stand-by display if another menu function is operating.

Information

● If you turn off the FOMA phone while the i-αppli Stand-by display is running, the confirmation display appears asking whether to launch i-αppli when you turn on the power again. Select "YES" or "NO".
● You can set only one software program for the i-αppli Stand-by display.
● Some i-αppli programs cannot be set for the Stand-by display.
● Note that you might not be able to receive timely information if you have set "Software setting (Stand-by net)" to "OFF".
● If the software which connects to the network is set for the i-αppli Stand-by display, it might not operate successfully because of radio wave conditions.
● When the i-αppli Stand-by display is activated, the image set for "Stand-by display" of "Display setting" will not be displayed.
● When you bring up the Stand-by display while a menu function is operating, the image set for "Stand-by display" of "Display setting" will be displayed, even when the i-αppli Stand-by display is set.
● When communicating frequency is extremely high in a certain period of time while running i-αppli, the confirmation display appears prompting you to confirm by pressing ⌨. When you press ⌨, the confirmation display appears asking whether to continue communicating. Select "YES" to continue communicating. When you select "NO", communicating ends but the i-αppli continues running. Select "End" to close the i-αppli. When you select "NO" and try to re-start communicating, the confirmation display appears asking whether to start communicating. Select "YES" or "End".
● If you set Lock All or PIM Lock when the i-αppli Stand-by display is running, the i-αppli Stand-by display will end. If you set Lock All, the image set for "Stand-by display" of "Display setting" will be displayed and if you set PIM Lock, the default Stand-by display will be displayed. The i-αppli Stand-by display will return when you release Lock All or PIM Lock.
