Dividends declared and paid per share*11	200	1,000	2,000	3,000	4,000	34.03	

1. Translations of the Japanese yen amounts into U.S. dollars are included solely for the convenience of readers by using the noon buying rate in New York City for cable transfers in foreign currencies as certified for customs purposes by the Federal Reserve Bank of New York on March 30, 2007, which was ¥117.56 to U.S.\$1.00.
2. Total debt = Short-term borrowings + Current portion of long-term debt + Long-term debt
3. Free cash flows = Net cash provided by operating activities + Net cash used in investing activities.
4. Irregular factors represent the effects of uncollected revenues due to bank closure at the end of periods. Changes in investments for cash management purpose were derived from purchases, redemption at maturity and sales of financial instruments held for cash management purposes with original maturities of longer than three months. For the reconciliations of these Non-GAAP financial measures, see page 110.
5. Capital expenditures are calculated on an accrual basis for the purchases of property, plant and equipment, and intangible and other assets.
6. ROCE ratios are calculated using the simple average of the applicable year-end balance sheet figures.
7. EBITDA = Operating income + Depreciation and amortization + Losses on sale or disposal of property, plant and equipment + Impairment loss
EBITDA margin = EBITDA / Total Operating revenues. For the reconciliations of these Non-GAAP financial measures, see page 110.
8. ROCE (Return on capital employed) = Operating income / (Shareholders' equity + Total debt)
9. Debt ratio = Total debt / (Shareholders' equity + Total debt)
10. In the calculation of per share data, treasury stocks are not included in the number of shares outstanding during or at the end of the year.
11. The dividends declared and paid per share are presented in the year they were paid.
