Music Player Supports Windows Media Audio®

In addition to support for a variety of online music stores, the F902IS comes with a USB cable and conversion adapter for earphone with microphone making the handset easy to use.

※ Windows Media Audio is a registered trademark of Microsoft Corp. in the U.S. and other countries.

Fingerprint Sensor on Back of Handset

Fingerprint sensor can be used when the handset is closed.
Osai-fu-Keitai can be used easily:

1. IC card lock can be activated merely by holding down side key or using rear menu??.
2. Lock can be disengaged with fingerprint sensor on back of handset.
3. Osai-fu-Keitai can be used immediately.
Handset will light up as a sign of usage.

Outside Illumination Panel for Easy Operation

The handset can be operated even when closed by simply touching the round illumination panel. The electrostatic pad is a fun and novel way to use a phone.

Manage Multiple Passwords with Fingerprint Sensor!

Multiple passwords and IDs can easily be managed from one location.

Once a password or ID is registered, it can be easily selected and input from a list of registered entries. This is made possible with the addition of secure authentication only by fingerprint.
