5G enables high-presence jam sessions anytime and anywhere

NETDUEŦTO™

Musicians can play along remotely through the high-speed network

»5G

**NETDUEŦTO technology enables
the stable transfer of interactive data
with consistently low latency.**

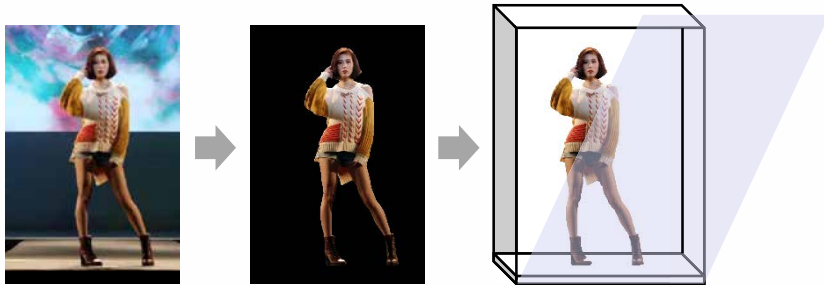

- **Automatic optimization and minimization of data buffering**
- **Easy configuration without complicated router customization**

More Info

Ultra-Realistic Communication Technology "Kirari!" transmits performers to remote sites with extreme reality

Kirari! "Real-time image extraction" technology removes backgrounds from camera images without a green screen.

The system merges virtual performers with the real stage by projection onto a half-mirror film.
