

Global Expansion of Private 5G and Solutions

- Flexible deployment supported with O-RAN -

NTT DOCOMO, INC.

Stability

Not affected by traffic from external networks

Flexibility

Network construction as necessary

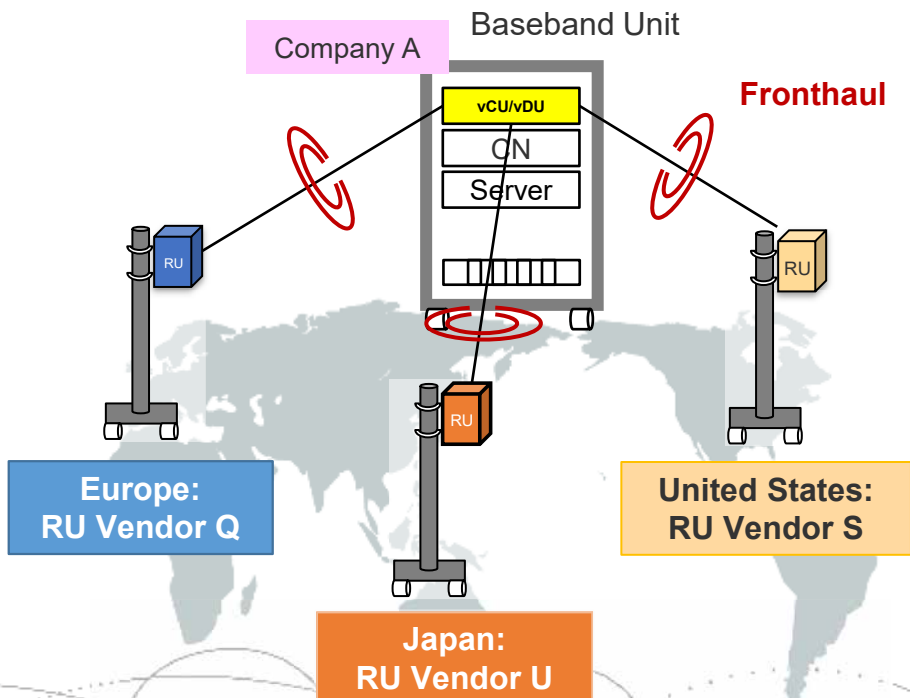

Independence

Freedom from dependence on public 5G networks

**Work with RU vendors worldwide
to accommodate different frequencies**

**Build networks optimized
for solutions and locations**

RU vendor products

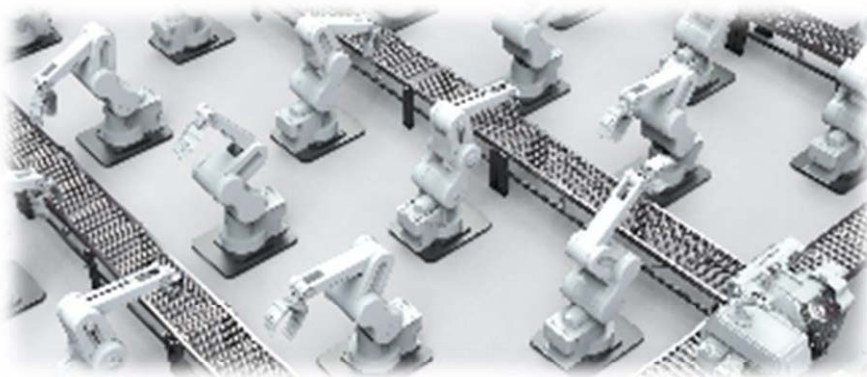

DOCOMO products

Verification of highly reliable 5G networks for production-control system in factories

FANUC Headquarters (Yamanashi Prefecture)

5G connections and radio control for industrial equipment (CNC devices, robots, machine tools, sensors, etc.) in factories

Hitachi Omika Works (Ibaraki Prefecture)

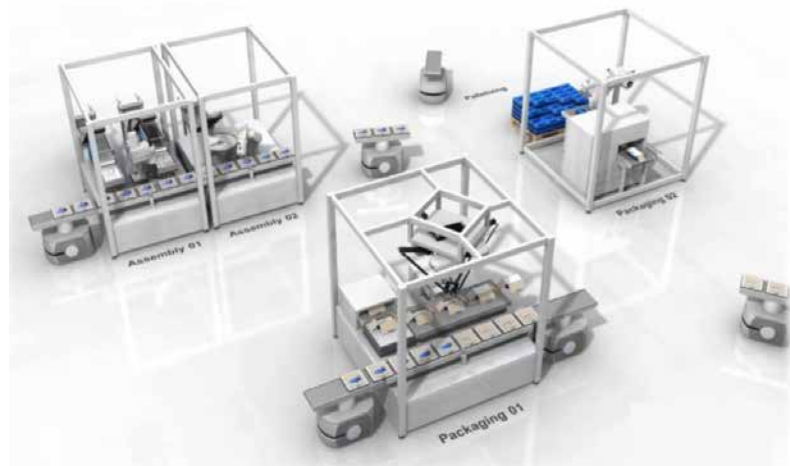

Demonstrate applicability for control networks and confirm real-time sharing of high-definition video for remote assistance

Flexible production lines and use of AI & IoT for real-time coaching

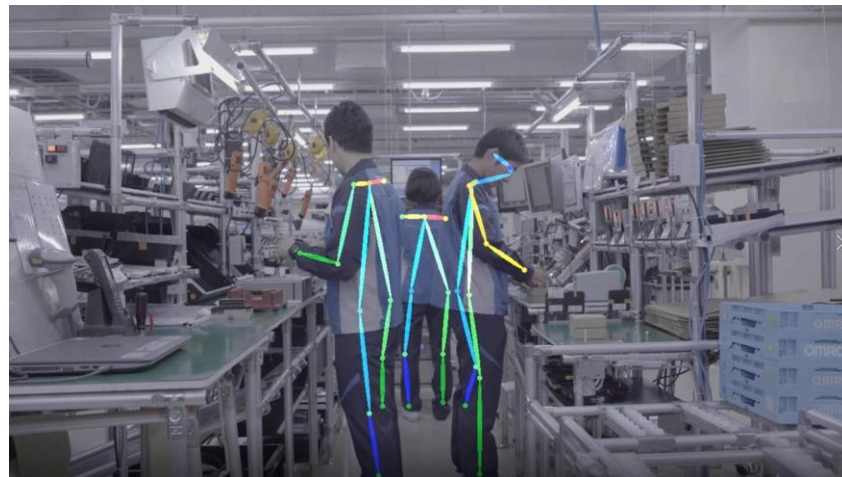

Flexible production lines

Incorporate automated guided vehicles (AGVs) for faster production and enable manufacturing line layouts to be changeable quickly

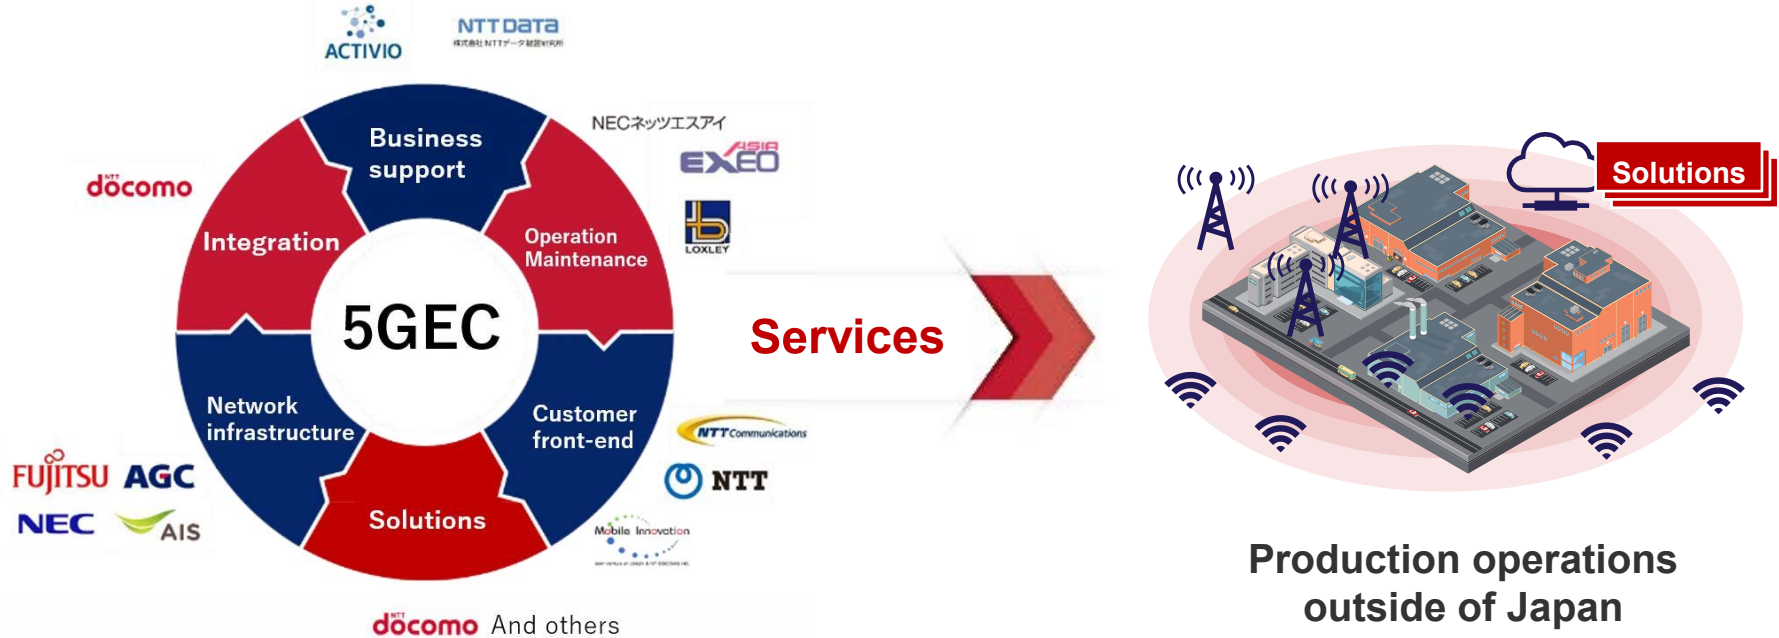

AI & IoT for real-time coaching

Provide line operators with real-time feedback, including comparisons with veteran operators, following AI analysis of collected data about them.

5G Global Enterprise Solution Consortium (5GEC)

The 13-firm consortium will strive to deliver one-stop solutions and DX initiatives implemented with 5G.

The logo for NTT docomo, featuring the letters "NTT" in a small, red, sans-serif font above the word "docomo" in a larger, red, lowercase sans-serif font. The background is a light gray with various geometric shapes and patterns, including a large dotted circle on the left, a dotted triangle at the top right, and a dotted circle on the right side. There are also several thin gray lines and shapes scattered throughout the background.
