Outline of @FreeD Service

	Monthly Package	One-year Package
Subscription Fee	4,880 yen (per month)	48,000 yen (per year, paid in advance)
Data/Voice Communication with non-compatible ISP Access Points	Yes [*]	No
Transmission	32 kbps/64 kbps (dormant mode ^{**})	
Applicable Numbers	Internet providers and intranet LAN telephone numbers compatible with @FreeD ^{***}	
Compatible Terminals	P-in Free 1P, P-in Free 1S (as of April 1, 2003)	

^{*}Fee is not included in @FreeD subscription. Data/voice communication charge same as Plan 270.

^{**}The connection goes into a "sleep" or "dormant" mode if no data is transmitted after a certain period of time or if the connection is weak. While in "dormant" mode, the connection is maintained without actively using a traffic channel on the network. When the user needs to send or receive data, the connection is automatically reactivated. Not only does this function help save PC and PDA battery life, data will continue being transmitted even if the user is briefly out of the network area or will continue downloading from the point communication was disrupted.

^{***}Users are responsible for any Internet provider access fees.

New Terminal Specifications

	P-in Free 1P	P-in Free 1S
