Features of F801i Model

1. Child protection tools

- Emergency alarm
  - ・100-decibel alarm alternately produces two types of noise
- High-intensity LED
  - ・High-intensity LED emits a bright light visible to people in surrounding area
- Location functions
  - ・Powering off phone or using alarm triggers automatic message about incident and handset's location to imadoco search user
  - ・Key on side of handset sends message notifying handset's location
  - ・Powered-off phone turns back on (in as little as five minutes) and sends message about incident and handset's location to imadoco search user
  - ・imadoco kantan search™ enables child to easily confirm location of loved one

2. Amulet-style remote controller

- Remote lock
  - ・Handset automatically locks when separated by more than a certain distance from remote controller worn by child
- Remote beeper
  - ・Button on controller makes misplaced handset beep if less than approximately 10 meters away (may vary with usage environment)
- Misplacement alert
  - ・Automatic message notifies registered person that remote controller worn by child has been separated from handset by more than a certain distance for more than 5 minutes.

3. Waterproof design

- Waterproof body (levels IPX5 and IPX7)
  - ・Resistant to accidental immersion (up to 30 minutes at one meter depth) or concentrated water sprays

4. Other safety measures

- Content protection
  - ・Child can be restricted from using certain features, such as i-mode, e-mail, i-appli™ and/or camera
  - ・Use of selected features also can be restricted by length of time
  - ・Compatible with "Kids i-mode filter" (separate contract) to restrict certain i-mode sites
- Battery protection
  - ・Battery secured with unique screw to prevent removal and phone power-down (special tool required to remove screw)

5. Child-oriented applications

- Knowledge tools
  - ・Kids Safe Training quiz to promote child's understanding of mobile phone protocol
  - ・Japanese dictionary
  - ・Maps for children
