Transmission speeds are theoretical maximums. Services provided on a best-effort basis. Speeds may vary depending on network traffic or transmission environments.

Xi offers downlinks of up to 75 Mbps indoors in selected buildings and 37.5 Mbps in other areas.

Even within FOMA HIGH-SPEED service areas, communications speeds may be limited to 384 Kbps depending on location.

<sup>\*</sup>Requires subscription to sp mode.

Online applications such as browsing and games may not function normally on an external device depending on the user's location and environment. In the default setting, the link between the external device and the smartphone/tablet is not protected by a password or other security measures. We highly recommend that the use of password-protected security measures.

For FOMA-compatible handsets, we strongly recommend users sign up for a low-cost packet service, such as Pake-hodai FLAT, to limit packet communication fees to communications via external devices such as PCs, due to the possibility of excessive communication charges. When the tethering function is engaged, all packet communication is treated as communications via an external device even if no such connection is used. When finished communicating via an external device, users should disengage the tethering function. Users signed up for an all-inclusive FOMA low-cost data plan can access this service. When the tethering function is engaged, sp mode functions other than Internet connection and email service cannot be used.

sp mode, sp mode mail, Xi, i-channel, docomo Drive Net, dmarket, Osaifu-Keitai, Melody Call, WORLD WING, Area Mail, and imadoco search are trademarks or registered trademarks of NTT DOCOMO, INC. in Japan and/or other countries.

sp mode, sp mode mail, Xi, i-channel, docomo Drive Net, dmarket, Osaifu-Keitai, Melody Call, WORLD WING, Area Mail, imadoco search and are only available to subscribers in Japan.

Osaifu-Keitai (mobile wallet) refers to mobile phones equipped with a contactless IC card, as well as useful functions/services enabled by the IC card. With this, mobile phones can be utilized as electronic money, credit cards, electronic tickets, membership cards, airline tickets and more.
