“Omakase Lock” phone-remote lock service will launch once preparations are completed. DOCOMO will announce the launch via its website.

The sp-mode basic service fee is 315 yen/month. The service allows use of existing i-mode mail addresses with the domain @docomo.ne.jp. sp-mode mail is not compatible with the Family Discount Plan. Phone book backup must be configured in the initial settings. Data capacity for backup has a maximum limit.

Transmission speeds are theoretical maximums. Services provided on a best-effort basis. Speeds may vary depending on network traffic or transmission environments.

Even within FOMA HIGH-SPEED service areas, communications speeds may be limited to 384 Kbps depending on location. Please visit DOCOMO’s website for information about service areas offering max. 5.7 Mbps uplink.

For tethering, users must subscribe to sp mode. Users are strongly recommended to sign up for a low-cost packet service, such as Pake-hodai FLAT, Xi Pake-hodai FLAT, to limit packet communication fees to communications via external devices such as PCs, due to the possibility of excessive communication charges. When the tethering function is engaged, all packet communication is treated as communications via an external device even if no such connection is used. When finished communicating via an external device, users should disengage the tethering function. When connecting to the Internet via a tethered device, certain applications (browsing, gaming, etc.) may not work properly depending on the usage environment. Security measures, including passwords for connection between external devices and smartphones, must be set by the user. The use of passwords is recommended.

Both devices accept the DOCOMO mini UIM card only.

*sp mode, sp mode mail, Xi, i-channel, docomo Drive Net, dmarket, Osai-fu-Keitai, Melody Call, WORLD WING, Area Mail, and imadoco search are trademarks or registered trademarks of NTT DOCOMO, INC. in Japan and/or other countries.*
