

## Attachment

### **Other DOCOMO Exhibits at CEATEC JAPAN 2014**

- **Evolving authentication technology**

#### Portable SIM

Portable SIM, the world's first mini device that enables network-access authentication without the need to physically insert a SIM card, will be on display. With Portable SIM, users can activate any compatible smartphone or tablet to access a call or an email with a simple wave.

- **CSR**

#### Disaster-resilient mobile network systems

The exhibit will introduce R&D efforts of network virtualization technology to create a more disaster-resilient mobile network system that reduces traffic congestion and improves network service availability after a major disaster.

#### Collecting and recycling used mobile devices

All visitors are welcome to drop off old mobiles or PHS handsets, batteries, rechargers or cradles (any model or make) at the DOCOMO booth for recycling. DOCOMO, which endeavors to reduce its environmental load and conserve valuable resources, will use special equipment to ensure that all personal information stored in the devices is destroyed.

- **Higher-quality of VoLTE sound**

#### New smartphone lineup

Visitors will get a sneak preview of VoLTE higher-quality voice calls using selected mobile devices from DOCOMO's winter 2014 / spring 2015 lineup of advanced smartphones.
