Quarterly Securities Report

(The Third Quarter of the 28th Business Term)

NTT DOCOMO, INC.

Table of Contents

[Note]

This document is an English translation of certain items that were disclosed in our Quarterly Securities Report for the nine-month period ended December 31, 2018, which we filed on February 7, 2019 with the Financial Services Agency of Japan.

The forward-looking statements and projected figures concerning the future performance of NTT DOCOMO, INC. and its subsidiaries and associates contained or referred to herein are based on a series of assumptions, projections, estimates, judgments and beliefs of the management of NTT DOCOMO, INC. in light of information currently available to it regarding NTT DOCOMO, INC. and its subsidiaries and associates, the economy and telecommunications industry in Japan and overseas, and other factors. These projections and estimates may be affected by the future business operations of NTT DOCOMO, INC. and its subsidiaries and associates, the state of the economy in Japan and abroad, possible fluctuations in the securities markets, the pricing of services, the effects of competition, the performance of new products, services and new businesses, changes to laws and regulations affecting the telecommunications industry in Japan and elsewhere, other changes in circumstances that could cause actual results to differ materially from the forecasts contained or referred to herein, as well as other risks included in our most recent Annual Securities Report.

Net cash used in financing activities	Millions of yen	(326,961)	(494,654)	(690,768)
Cash and cash equivalents at end of period	Millions of yen	529,812	582,764	390,468

Notes:

(1) All figures presented above are based on the condensed consolidated financial statements prepared in accordance with International Financial Reporting Standards (“IFRS”).

(2) As we prepare quarterly consolidated financial reports, changes in non-consolidated key financial data, among others, are not provided.

(3) Operating revenues do not include consumption taxes.

(4) Basic earnings per share attributable to shareholders of NTT DOCOMO, INC. are calculated after subtracting the number of treasury shares from the total number of shares outstanding.

(5) Diluted earnings per share attributable to shareholders of NTT DOCOMO, INC. are not stated because we did not have potentially dilutive common shares that were outstanding during the period.

2. Description of Business

There were no material changes to the business of NTT DOCOMO, INC. or its associated companies during the nine months ended December 31, 2018.

There were no material changes with respect to associated companies during the nine months ended December 31, 2018.

Item 2. Business Overview

1. Risk Factors

No risks, such as unusual changes in consolidated financial condition, results of operations or cash flow conditions, were newly identified during the nine months ended December 31, 2018. There was no material change in the risk factors that were described in our Annual Securities Report for the fiscal year ended March 31, 2018.

2. Management's Analysis of Consolidated Financial Condition, Results of Operations, and Cash Flow Conditions

This report contains certain forward-looking statements that are based on the management's judgments as of February 7, 2019, at which it was filed. As the Company started filing based on International Financial Reporting Standards (IFRS) in place of the U.S. Generally Accepted Accounting Principles (U.S. GAAP) from the first quarter of the fiscal year ending March 31, 2019, the consolidated financial results for the nine months ended December 31, 2017, and the full year of the previous fiscal year have been restated based on IFRS for the purpose of comparison and analysis.

(1) Business Overview

In Japan's telecommunications market, competition has intensified due to the government's pro-competition policy, increased adoption of low-cost smartphone services offered by the sub-brands of Mobile Network Operators (MNOs)*1 and Mobile Virtual Network Operators (MVNOs) and the new entry in the MNO market by a player from a different industry. MNOs have employed various measures to reinforce their non-telecommunications business, such as offering a common point program or new payment platforms, in an effort to expand and strengthen their customer base. Competition beyond the conventional boundaries of the telecommunications business is shifting into high gear, as players accelerate collaboration, investment or alliance with other industries in pursuit of future growth through the use of new technologies such as Artificial Intelligence (AI), IoT*2 and drones, with a view to the transition to 5G.

In this market environment, in April 2017, we developed and unveiled our Medium-Term Strategy 2020 "Declaration beyond" to realize a richer future with 5G.

In October 2018, we announced a new medium-term management strategy to present the concrete steps and the quantitative targets that will be addressed in accordance with "Declaration beyond." Our basic policy under this new medium-term management strategy is to shift our focus to "transformation into a business foundation centered on our membership base" and "5G roll-out and business creation." Under the new management strategy, although we project a decline in profit as a result of the customer return measures that we plan to implement in FY2019 to solidify our customer base, we will work to generate additional revenue opportunities in Smart life, enterprise and 5G-related businesses leveraging our customer base, while at the same time striving for further cost efficiency improvement. Our goal is to deliver ¥5 trillion in operating revenues in the fiscal year ending March 31, 2022, and to recover ¥990 billion in operating profit (a level comparable to the operating profit for the fiscal year ended March 31, 2018) in the fiscal year ending March 31, 2024, so that we can realize a sustainable growth in the 2020s. As our shareholder return policy under this medium-term management strategy, we will accelerate our efforts to continue dividend increases and expeditious share repurchase.

During the nine months ended December 31, 2018, we strived to increase the user count of smartphones and tablet devices by introducing "Welcome Sumaho Wari," a package that offers discounts on the monthly communication fee for first-time users of these devices, and through other measures.

We also endeavored to increase the number of stores that handle our "d Payment" smartphone payment service as well as the stores participating in "d POINT" program not only in Japan but also overseas. As a result of these undertakings, the total number of "d POINT CLUB" members grew to 68.83 million and the number of "d POINT CARD" registrants*3 reached 30.73 million as of December 31, 2018. In addition, the total usage of "d POINTs" for the nine months ended December 31,2018 amounted to 118.6 billion points, which included usage of 54.5 billion points at partnership stores.

*1: Abbreviation for Mobile Network Operator. A mobile telecommunications service provider that provides mobile telecommunications services through wireless stations that it establishes or operates itself.

*2: Abbreviation for Internet of Things. A concept that describes a world in which everything is connected to the Internet, enabling remote control and management of devices, etc.

*3: The number of users who can earn and use "d POINTs" at participating stores by registering their personal information.

<Actions for Future Growth>

- In October 2018, we agreed with Tokio Marine & Nichido Fire Insurance Co. Ltd. to start studies on "use of AI for insurance recommendation" and "full digitization of insurance processes." Further down the line, we will aim to establish a mechanism in which the AI engine presents the most recommended insurance product to each customer based on their individual risk conditions or budget requirement that have been obtained and analyzed via smartphones. We aim to evolve the "insurance for mobile phones" i.e., an insurance that can be bought for short periods of time whenever necessary and can be purchased easily via smartphones, into an "Insurance entrusted to mobile phones" where AI automatically recommends the optimal plan to each individual through mobile phones.

- In October 2018, we started joint studies with THK Co. Ltd. and Cisco Systems G.K. for building a failure symptom detection application for manufacturers, "OMNI edge," which can be deployed and operated easily and safely on a global scale, aiming for its commercial rollout in the spring of 2019.

- In November 2018, we commenced a verification trial aimed at enhancing the operational efficiency of restaurant outlets in cooperation with Saizeriya Co. Ltd. ("Saizeriya"). In this verification trial, leveraging the "near-future traffic projection" solution—the real-time version of our Mobile Spatial Statistics[*1] and Saizeriya's actual sales data of each outlet, we will employ "real-time sales prediction technique[*2]" which was developed using our experience and know-how pertaining to AI to provide a forecast on sales amount.

  *1: Population statistics that leverage information concerning the number of people in a given area or group of different attributes, which do not contain any information that enables identifying individual customer.
  *2: One of the technology components of NTT Group's AI, corevo.

- In December 2018, we organized "DOCOMO Open House 2018" to showcase the various co-creation activities that we have promoted together with a wide range of external partners. During this event, over 200 exhibitions and lectures on state-of-the-art technologies, e.g., 5G, AI and IoT, as well as business solutions that leverage such technologies were organized. Examples of the various initiatives that were put on display include remote operations of humanoid robot, "T-HR3", that take advantage of 5G's low latency, a glass antenna that realizes the world's first[*1] "conversion of a window into a base station" that can be deployed without spoiling the scenery and the progress of the verification trial of Yokohama City's MaaS[*2] solution, "AI-operated bus[*3]."

  *1: Based on a survey by NTT DOCOMO, INC. and AGC Inc.
  *2: Abbreviation for Mobility as a Service. The concept of mobility as a centralized service for users, not just as a means. For example, a service that provides the best means of transportation to meet travel needs from the point of departure to the destination.
  *3: An on-demand shared transport service in which demand for service is calculated in real time by AI to operate optimal transport service at the optimal time and route.

- In December 2018, we entered into a business and capital alliance agreement with Toreta, Inc. ("Toreta") with the goal of deploying new food-related businesses. Through this partnership, the two companies will explore various new businesses leveraging Toreta's know-how in restaurant service operations and DOCOMO's customer service know-how accumulated through the operation and management of "d gourmet" service and our subsidiary, ABC Cooking Studio, Co. Ltd.

For the nine months ended December 31, 2018, operating revenues increased by ¥64.4 billion from the same period of the previous fiscal year to ¥3,654.1 billion. This was mainly due to an increase in equipment sales due to an increase in the proportion of advanced smartphones in the number of handsets sold as well as an increase in optical-fiber broadband service revenues due to growth in the number of “docomo Hikari” user. The increase in revenues due to these factors exceeded the decrease in mobile communications services revenues due to expansion of customer returns.

Operating expenses increased by ¥18.5 billion from the same period of the previous fiscal year to ¥2,752.1 billion. This was mainly due to an increase in the cost of equipment sold associated with an increase in equipment sales and an increase in expenses associated with the expansion of “docomo Hikari” revenues, despite a decrease in depreciation expenses.

As a result, operating profit increased by ¥45.9 billion from the same period of the previous fiscal year to ¥902.0 billion for the nine months ended December 31, 2018.

Profit before taxes decreased by ¥109.0 billion from the same period of the previous fiscal year to ¥911.6 billion. The main reason for this is that in the three months ended December 31, 2017, DOCOMO received payment of an arbitration award from Tata Sons Limited and recorded it as "Income from arbitration award."

Accordingly, Profit attributable to shareholders of NTT DOCOMO, INC. decreased by ¥90.1 billion from the same period of the previous fiscal year to ¥607.6 billion for the nine months ended December 31, 2018.

Consolidated results of operations for the nine months ended December 31, 2017 and 2018 were as follows:

<Results of operations>

	Billions of yen			
	Nine Months Ended December 31, 2017	**Nine Months Ended December 31, 2018**	Increase (Decrease)

Total operating revenues	¥ 3,589.8	**¥ 3,654.1**	¥ 64.4	1.8%

Segment Results

Telecommunications business—

<Results of operations>

	Billions of yen			
	Nine Months Ended December 31, 2017	**Nine Months Ended December 31, 2018**	Increase (Decrease)	
Operating revenues from telecommunications business	¥ 2,943.7	**¥ 3,005.2**	¥ 61.6	2.1%
Operating profit (loss) from telecommunications business	747.9	**767.2**	19.3	2.6

Operating revenues from the telecommunications business for the nine months ended December 31, 2018 increased by ¥61.6 billion, or 2.1%, from ¥2,943.7 billion for the same period of the previous fiscal year to ¥3,005.2 billion.

This was mainly due to an increase in equipment sales due to an increase in the proportion of advanced smartphones in the number of handsets sold as well as an increase in optical-fiber broadband service revenues due to growth in the number of “docomo Hikari” user. The increase in revenues due to these factors exceeded the decrease in mobile communications services revenues due to expansion of customer returns.

Operating expenses from the telecommunications business increased by ¥42.2 billion, or 1.9%, from ¥2,195.8 billion for the same period of the previous fiscal year to ¥2,238.0 billion. This was mainly due to an increase in cost of equipment sold associated with an increase in equipment sales and an increase in expenses associated with the expansion of “docomo Hikari” revenues, despite a decrease in depreciation expenses.

Consequently, operating profit from the telecommunications business was ¥767.2 billion, an increase of ¥19.3 billion, or 2.6%, from ¥747.9 billion for the same period of the previous fiscal year.

<<Key Topics>>

- In December 2018, we started “docomo Student Discount,” a program that offers discounts on monthly communication charges or giveaway “d POINTs” to users of age 25 and under or their families in an endeavor to improve the returns to customers.

- In November 2018, we commenced the “Welcome Sumaho Wari” program, which provides discounts on monthly communication charges to first-time smartphone users switching from a feature phone. As a result of this and other measures, the total number of our smartphone and tablet users grew to 39.67 million as of December 31, 2018, an increase of 2.19 million from December 31, 2017.

- In December 2018, we launched a 24/7/365 chatbot* consultation service, “Otasuke Robot,” to provide a casual means of consultation for our users of smartphones and “docomo Hikari” optical-fiber broadband service, so they can find a solution to their troubles even during the hours when docomo Shops or Information Center are congested or closed.

  *: A program or service that provides automated response to inquiries named after “chat” and “robot”.

- To promote the construction of a network that provides a comfortable communication environment, we expanded the coverage of our “PREMIUM 4G” service to 1,676 cities and 131,800 base stations across Japan as of December 31, 2018, and started a communication service that delivers a maximum upload speed of 131.3 Mbps by aggregating multiple carrier frequencies. We also increased the total number of LTE base stations to 199,500 across Japan to further expand the coverage of our LTE service.

Number of subscriptions by services and other operating data are as follows:

<Number of subscriptions by services>

	Thousand subscriptions			
	December 31, 2017	**December 31, 2018**	Increase (Decrease)	
Mobile telecommunications services	75,678	**77,517**	1,839	2.4 %
Including: "Kake-hodai & Pake-aeru" billing plan	40,598	**44,637**	4,039	9.9
Mobile telecommunications services (LTE(Xi))	48,200	**53,834**	5,634	11.7
Mobile telecommunications services (FOMA)	27,478	**23,684**	(3,795)	(13.8)
"docomo Hikari" optical broadband service	4,480	**5,545**	1,065	23.8

Note: Number of subscriptions to Mobile telecommunications services, Mobile telecommunications services (LTE(Xi)) and Mobile telecommunications services (FOMA) includes Communication Module services subscriptions.

<Number of units sold>

	Thousand units			
	Nine Months Ended December 31, 2017	**Nine Months Ended December 31, 2018**	Increase (Decrease)	
Number of units sold	18,598	**17,765**	(832)	(4.5)%
Mobile telecommunications services (LTE(Xi))				
New LTE(Xi) subscription*1	7,085	**6,963**	(122)	(1.7)
Change of subscription from FOMA	2,307	**2,119**	(189)	(8.2)
LTE(Xi) handset upgrade by LTE(Xi) subscribers	7,601	**7,568**	(32)	(0.4)
Mobile telecommunications services (FOMA)				
New FOMA subscription*1	940	**732**	(209)	(22.2)
Change of subscription from LTE(Xi)	21	**17**	(4)	(17.2)
FOMA handset upgrade by FOMA subscribers	643	**366**	(277)	(43.1)
Churn rate*2	0.63%	**0.55%**	(0.08)point	–
Handset churn rate*3	0.49%	**0.45%**	(0.03)point	–

*1: New subscriptions include mobile line subscriptions of MVNOs and Communication Module subscriptions.
*2: "Churn rate" is calculated excluding the subscriptions and cancellations of subscriptions of MVNOs.
*3: Churn rate in Basic Plans (excluding Data Plans and Device Plus 500), Xi/FOMA Billing Plans and Type Limit Value / Type Limit for smartphones and feature phones, etc.

<Trend of ARPU and MOU>

	Yen		
	Nine Months Ended December 31, 2017	**Nine Months Ended December 31, 2018**	Increase (Decrease)	
Aggregate ARPU	¥ 4,710	¥ **4,820**	¥ 110	2.3 %
Mobile ARPU	4,380	**4,390**	10	0.2
"docomo Hikari" ARPU	330	**430**	100	30.3
MOU (minutes)	137	**135**	(2)	(1.5)

Notes:

1. Definition of ARPU and MOU
   a. ARPU (Average monthly Revenue Per Unit):
   Average monthly revenue per unit, or ARPU, is used to measure the average monthly operating revenues attributable to designated services on a per user basis. ARPU is calculated by dividing telecommunications services revenues (excluding certain revenues) by the number of active users of our wireless services in the relevant periods, as shown below under "ARPU Calculation Method." We believe that our ARPU figures provide useful information to analyze the average usage per user and the impacts of changes in our billing arrangements.
   b. MOU (Minutes of Use):
   Average monthly communication time per user

2. ARPU Calculation Methods
   Aggregate ARPU= Mobile ARPU + "docomo Hikari" ARPU

   - Mobile ARPU : Mobile ARPU Related Revenues {Voice related revenues (basic monthly charges, voice communication) + Packet related revenues (basic monthly charges, packet communication charges)} / Number of active users
   -"docomo Hikari" ARPU : "docomo Hikari" ARPU Related Revenues (basic monthly charges, voice communication changes) /Number of active users

3. Active Users Calculation Method
   Sum of number of active users for each month ((number of users at the end of previous month + number of users at the end of current month) /2) during the relevant period

4. The number of "users" used to calculate ARPU and MOU is the total number of subscriptions, excluding the subscriptions listed below:
   a. Subscriptions of communication module services, "Phone Number Storage," "Mail Address Storage," "docomo Business Transceiver" and wholesale telecommunications services and interconnecting telecommunications facilities that are provided to MVNOs; and
   b. Data Plan subscriptions in the case where the customer contracting for such subscription in his/her name also has a subscription for "Xi" or "FOMA" services in his/her name.

   Revenues from communication module services, "Phone Number Storage," "Mail Address Storage," "docomo Business Transceiver," wholesale telecommunications services and interconnecting telecommunications facilities that are provided to MVNOs, and revenues related to "d POINT" are not included in the ARPU calculation.

Smart life business—

<Results of operations>

	Billions of yen			
	Nine Months Ended December 31, 2017	**Nine Months Ended December 31, 2018**	Increase (Decrease)	
Operating revenues from smart life business	¥ 336.6	**¥ 338.0**	¥ 1.4	0.4%
Operating profit (loss) from smart life business	49.6	**58.7**	9.2	18.5

Operating revenues from the smart life business for the nine months ended December 31, 2018 were ¥338.0 billion, an increase of ¥1.4 billion, or 0.4%, from ¥336.6 billion for the same period of the previous fiscal year. This was mainly due to an increase in revenues from our finance/payment services and other services exceeded the decrease in revenues, driven by the sale of "Radish Boya" which had been a subsidiary of NTT DOCOMO in the previous fiscal year and was sold in February 2018.

Operating expenses from the smart life business were ¥279.3 billion, a decrease of ¥7.7 billion, or 2.7%, from ¥287.0 billion for the same period of the previous fiscal year. This was mainly due to a decrease in expenses attributable to the sale of "Radish Boya." This decrease in expense was greater than an increase in expenses associated with the increase in revenues from our finance/payment services.

As a result, operating profit from the smart life business was ¥58.7 billion, an increase of ¥9.2 billion, or 18.5%, from ¥49.6 billion for the same period of the previous fiscal year.

<<Key Topics>>

- We expanded the number of stores where our point service "d POINT" can be used by adding the "St. Marc Cafe" outlets (operated by Saint Marc Holdings, Co., Ltd.) and "Kusuri no Aoki" stores (operated by Kusuri No Aoki Co., Ltd.) We also expanded the number of stores that handle "d POINT" in markets outside Japan, enabling the use of "d POINT" in New York and Hawaii. As a result of these undertakings, the total number of partners participating in the "d POINT" program grew to 384 as of December 31, 2018.

- In September 2018, we enabled the use of "d Payment" service for smartphones on "Amazon.co.jp" online store operated by Amazon Japan, G.K. as well as the physical outlets of "FamilyMart" convenience stores operated by FamilyMart, Co. Ltd. Inc.

- The total members* of our credit card service "d CARD" grew to 19.66 million as of December 31, 2018, up 1.06 million from the number a year ago, driven by the new member acquisition campaign and other initiatives. The total amount of transactions processed through our finance/payment services reached approximately ¥2,859.3 billion for the nine months ended December 31, 2018, an increase of ¥535.3 billion from the same period of the previous fiscal year.

*: The total number of members of "d CARD" and "d CARD mini."

Other businesses—

<Results of operations>

	Nine Months Ended December 31, 2017	**Nine Months Ended December 31, 2018**	Increase (Decrease)	
	Billions of yen			
Operating revenues from other businesses	¥ 326.5	**¥ 328.5**	¥ 2.0	0.6%
Operating profit (loss) from other businesses	58.7	**76.1**	17.4	29.6

Operating revenues from the other businesses for the nine months ended December 31, 2018 amounted to ¥328.5 billion, an increase of ¥2.0 billion, or 0.6%, from ¥326.5 billion for the same period of the previous fiscal year, driven mainly by an increase in the proportion of advanced smartphones in the number of subscriptions to our "Mobile Device Protection Service."

Operating expenses from the other businesses were ¥252.5 billion, a decrease of ¥15.4 billion, or 5.7%, from ¥267.8 billion for the same period of the previous fiscal year, mainly due to a decrease in expenses as a result of pursuing further cost efficiency.

Consequently, operating profit from the other businesses was ¥76.1 billion, an increase of ¥17.4 billion, or 29.6%, from ¥58.7 billion for the same period of the previous fiscal year.

<<Key Topics>>

- In October 2018, we started offering "LTE-M," a communication system for IoT service that lowers the cost of communication modules and reduces power consumption by using only a limited portion of LTE spectrum.

- Starting October 2018, we lowered the fee of the handset repair service offered under our Mobile Device Protection Service to maximum ¥3,000, and extended the support period till the end of repair acceptance of the applicable handset model to further improve our repair-related offerings. The number of subscriptions to "Anshin Pack," a package that combines "Mobile Device Protection Service" and various other services to ensure worry-free use of smartphones, reached 20.06 million as of December 31, 2018 after surpassing the 20 million mark earlier in the same month.

(2) Actions for Realizing a Sustainable Society

We aspire to help build a society in which everyone can share in a prosperous life of safety, security and comfort, beyond borders and across generations. We believe it is our corporate social responsibility (CSR) to fulfill the two aspects of (i) “Innovative docomo,” to solve various social issues in the fields of mobility, healthcare and medicine, education and learning, and climate change through the “co-creation of social values,” an initiative that we plan to pursue together with various partners to create new services and businesses, and (ii) “Responsible docomo,” to thoroughly ensure fair, transparent and ethical business operations as a foundation for the creation of such values. Accordingly, we will strive to realize a sustainable society while expanding our own businesses.

In November 2018, we were awarded a 5-star rating, the highest category in the “2nd Nikkei Smart Work Management Survey” by Nikkei, Inc. for the second straight year.

The principal actions we undertook in the three months ended December 31, 2018 are summarized below:

<Innovative docomo>

- In October 2018, to facilitate the adoption of ICT for education in Kumamoto City, we concluded a “collaboration agreement for promoting the use of ICT in education” with Kumamoto City, Kumamoto University and Prefectural University of Kumamoto, under which the parties will engage in the development of “a model curriculum that utilize ICT” for each subject, execution of various training programs for students and teachers as well as activities for the promotion and broader adoption of programming education.

- In November 2018, as part of our undertakings toward regional vitalization, we concluded a “coordination and collaboration agreement for economic revitalization of Miura Peninsula Region” with the Bank of Yokohama and Keikyu Corporation. The three companies will collaborate for industrial development and promotion of tourism of the Miura Peninsula Region under this agreement.

- In December 2018, we launched the “IoT x 5G x SDGs Co-Creation Project,” under which we will perform studies for new business creation jointly with partners participating in “DOCOMO 5G Open Partner Program” who have collaborated with us for solution creation particularly in the field of IoT and thereby the achievement of SDGs.

<Responsible docomo >

- We have been involved in the “Making medals from urban mines! Everyone’s Medal Project” promoted by the Tokyo Organizing Committee for the Olympic and Paralympic Games (“Organizing Committee”), which aims to produce the medals for the Tokyo 2020 Olympic and Paralympic Games from used mobile phones and other small home appliances. In October 2018, we completed the delivery of the first batch of the collected recycled metal to the Organizing Committee.

- Through our “Smartphone and Mobile Phone Safety Classes,” we teach participants the rules and manners of using smartphones and mobile phones, as well as how to respond to troubles that may arise with their use. We held a total of approximately 6,400 sessions with cumulative participation of approximately 1.24 million people during the nine months ended December 31, 2018.

(3) Trend of Capital Expenditures

<Capital expenditures>

	Nine Months Ended December 31, 2017	**Nine Months Ended December 31, 2018**	Increase (Decrease)	
	Billions of yen			
Total capital expenditures	¥ 403.5	**¥ 389.5**	¥ (14.0)	(3.5) %
Telecommunications business	383.8	**367.7**	(16.1)	(4.2)
Smart life business	10.2	**11.9**	1.7	17.2
Other businesses	9.5	**9.8**	0.3	3.6

Notes:
1. Capital expenditures include investments related to the acquisition of intangible assets.
2. Capital expenditures for the nine months ended December 31, 2018 do not include investments related to the acquisition of spectrum related assets.
3. The above amounts do not include consumption taxes, etc.

Capital expenditures for the nine months ended December 31, 2018 decreased by 3.5% to ¥389.5 billion due to our efforts to make capital expenditures more efficient and lower costs, while we constructed a more convenient mobile telecommunications network by expanding the area coverage of our “PREMIUM 4G” service and increased capital expenditure for the growth of our businesses.

(4) Financial Position

	December 31, 2017	**December 31, 2018**	Increase (Decrease)		(Reference) March 31, 2018
	Billions of yen				
Total assets	¥ 7,773.5	**¥ 7,718.0**	¥ (55.5)	(0.7)%	¥ 7,654.9
Equity attributable to shareholders of NTT DOCOMO, INC.	5,869.6	**5,302.1**	(567.5)	(9.7)	5,665.1
Liabilities	1,876.9	**2,387.2**	510.4	27.2	1,962.7
Including: Interest bearing liabilities	221.7	**51.4**	(170.3)	(76.8)	161.2
Shareholders’ equity ratio (1) (%)	75.5%	**68.7%**	(6.8)point	-	74.0%
Debt to Equity ratio (2) (multiple)	0.038	**0.010**	(0.028)	-	0.028

Notes1: (1) Shareholders’ equity ratio = Equity attributable to shareholders of NTT DOCOMO, INC. / Total assets.
(2) Debt to Equity ratio = Interest bearing liabilities / Equity attributable to shareholders of NTT DOCOMO, INC.
Notes2: The change in Equity attributable to shareholders of NTT DOCOMO, INC is mainly related to the purchase of treasury stock on January 7, 2019. Related information is disclosed in “Item 4. Financial Information 1. Condensed Consolidated Financial Statement Note 9 Equity and other equity items.”

(5) Cash Flow Conditions

	Nine Months Ended December 31, 2017	**Nine Months Ended December 31, 2018**	Increase (Decrease)	
	Billions of yen			
Net cash provided by operating activities	¥ 1,143.9	**¥ 835.6**	¥ (308.3)	(27.0)%
Net cash used in investing activities	(575.7)	**(148.7)**	427.0	74.2
Net cash used in financing activities	(327.0)	**(494.7)**	(167.7)	(51.3)
Free cash flows (1)	568.1	**686.9**	118.8	20.9
Changes in investments for cash management purposes	(79.7)	**300.1**	379.8	—
Free cash flows excluding changes in investments for cash management purposes (2)	647.8	**386.8**	(261.0)	(40.3)

Notes: (1) Free cash flows = Net cash provided by operating activities + Net cash used in investing activities
(2) Changes in investments for cash management purposes = Changes by purchases, redemption at maturity and disposals of financial instruments held for cash management purposes with original maturities of longer than three months

For the nine months ended December 31, 2018, net cash provided by operating activities was ¥835.6 billion, a decrease of ¥308.3 billion, or 27.0%, from the same period of the previous fiscal year. The main reason for this is that DOCOMO received payment of an arbitration award from Tata Sons Limited in the same period of the previous fiscal year and an increase in cash outflows for income taxes and an increase in trade and other receivables.

Net cash used in investing activities was ¥148.7 billion, a decrease of ¥427.0 billion, or 74.2%, from the same period of the previous fiscal year. This was mainly due to a decrease in cash outflows for purchases of short-term investments.

Net cash used in financing activities was ¥494.7 billion, an increase of ¥167.7 billion, or 51.3%, from the same period of the previous fiscal year. This was mainly due to an increase in cash outflows for payments of long-term debt and an increase in cash outflows in dividends paid.

As a result of the foregoing, the balance of cash and cash equivalents was ¥582.8 billion as of December 31, 2018, an increase of ¥192.3 billion, or 49.2%, from the previous fiscal year end.

(6) Operational and Finance Issues Faced by the Corporate Group

In October 2018, we revised the operating free cash flow* target for the fiscal year ending March 31, 2019 contained in "Item 2. Business Overview, 1. Business Policy, Business Environment, Issues to Address, etc." of our Annual Securities Report for the 27th Fiscal Year to ¥940 billion as a result of additional disaster response measures and an increase in capital expenditures required for the introduction of 5G system.

Our medium-term management strategy is explained in "Item 2. Business Overview, Management's Analysis of Consolidated Financial Condition, Results of Operations and Cash Flow Conditions, (1) Business Overview" of this Quarterly Securities Report.

* Operating free cash flow = EBITDA - Capital Expenditures

(7) Research and Development

Our research and development expenses for the nine months ended December 31, 2018 were ¥65.9 billion.

3. Material Contracts

There were no material contracts relating to our operations that were agreed upon or entered into during the third quarter ended December 31, 2018.

Item 3. Information related to NTT DOCOMO

1. Information related to NTT DOCOMO's Shares

October 1, 2018 – December 31, 2018	—	3,782,299,000	—	949,679	—	292,385

(5) Major Shareholders

Not applicable for the three months ended December 31, 2018.

(6) Information on Voting Rights

All details provided in this section "(6) Information of Voting Rights" are based on the register of shareholders as of the preceding reference date for the three months ended September 30, 2018, as the register of shareholders as of December 31, 2018 cannot be confirmed.

(a) Issued Shares

As of September 30, 2018

Classification	Number of Shares (shares)	Number of Voting Rights	Description
Shares without Voting Rights	—	—	—
Shares with Restricted Voting Rights (treasury stock and other stock)	—	—	—
Shares with Restricted Voting Rights (others)	—	—	—
Shares with Full Voting Rights (treasury stock and other stock)	(Treasury Stock) 189,114,400 shares of common stock	—	—
Shares with Full Voting Rights (others)	3,593,114,200 shares of common stock	35,931,142	—
Shares Representing Less than One Unit	70,400 shares of common stock	—	—
Number of Issued Shares	3,782,299,000 shares of common stock	—	—
Total Number of Voting Rights	—	35,931,142	—

Note: The total number of shares in "Shares with Full Voting Rights (others)" includes 38,800 shares held in the name of the Japan Securities Depository Center. "Number of Voting Rights" includes 388 voting rights associated with "Shares with Full Voting Rights" held in the name of the Japan Securities Depository Center.

(b) Treasury Stock

As of September 30, 2018

Name of Shareholder	Address	Number of Shares Held Under Own Name (shares)	Number of Shares Held Under the Names of Others (shares)	Total Shares Held (shares)	Ownership Percentage to the Total Number of Issued Shares
NTT DOCOMO, INC.	11-1, Nagatacho 2-chome, Chiyoda-ku, Tokyo	189,114,400	—	189,114,400	5.00%
Total	—	189,114,400	—	189,114,400	5.00%

Note: Number of shares held under own name was 189,114,500 as of December 31, 2018.

2. Changes in Directors and Senior Management

The change in directors and audit & supervisory board members during the period from the filing date of the Securities Report for the fiscal year ended March 31, 2018 to the filing date of this Quarterly Securities Report is as follows:

Change in Positions and Responsibilities

Name	Position	New Responsibilities	Former Responsibilities	Effective Date
Hiroyasu Asami	Senior Executive Vice President, Representative Member of the Board of Directors	Responsible for Technology, Devices, Information Strategy and Membership Base	Responsible for Technology, Devices and Information Strategy	July 1, 2018
Hiroshi Tsujigami	Senior Executive Vice President, Representative Member of the Board of Directors	Executive General Manager of Sales and Marketing Division, Responsible for Global business and Corporate	Executive General Manager of Sales and Marketing Division, Responsible for Global business, Corporate and Broadband Business	July 1, 2018

Item 4. Financial Information

1. Preparation method of the condensed consolidated financial statements

The condensed consolidated financial statements of DOCOMO have been prepared in accordance with International Accounting Standards ("IAS") 34, "Interim Financial Reporting" pursuant to Article 93 of the "Ordinance on Terminology, Forms, and Preparation Methods of Quarterly Consolidated Financial Statements, etc." (Cabinet Office Ordinance No. 64 of 2007).

International Financial Reporting Standards ("IFRS") was permitted as the designated international accounting standards for preparing consolidated financial statements following the amendments (Cabinet Office Ordinance No. 73 of December 11, 2009) to the "Ordinance on Terminology, Forms, and Preparation Methods of Consolidated Financial Statements" (Ordinance of the Ministry of Finance No. 28 of 1976), etc. DOCOMO has prepared its condensed consolidated financial statements based on IFRS from the first quarter ended June 30, 2018.

Figures in the condensed consolidated financial statements have been rounded to the nearest million yen.

2. Independent Auditor's Report on Quarterly Review

Pursuant to Article 193-2, Paragraph 1 of the Financial Instruments and Exchange Act of Japan, the condensed consolidated financial statements for the third quarter ended December 31, 2018 (from October 1, 2018 to December 31, 2018) and the nine months ended December 31, 2018 (from April 1, 2018 to December 31, 2018) have been reviewed by KPMG AZSA LLC.

3. Particular efforts to secure the appropriateness of the consolidated financial statements based on IFRS

(1) DOCOMO is a member of the Financial Accounting Standards Foundation.

(2) DOCOMO obtains appropriately the press release issued by the International Accounting Standards Board and official pronouncements. In addition, DOCOMO has formulated the Group Accounting and Finance Rules pursuant to IFRS and prepared the consolidated financial statements based on those rules.

2. Notes to Condensed Consolidated Financial Statements (UNAUDITED)

1. Reporting entity

NTT DOCOMO, INC. (the “Company”) is a company located in Japan. The addresses of its registered headquarters and main business offices are disclosed on its website (https://www.nttdocomo.co.jp/english).

The Company primarily engages in mobile telecommunications services as a member of the NTT group, with NIPPON TELEGRAPH AND TELEPHONE CORPORATION (“NTT”) as the holding company. The Company and its subsidiaries constitute the NTT DOCOMO group (“DOCOMO”) and operate its business.

The condensed consolidated financial statements of DOCOMO for the quarter ended December 31, 2018 were approved on February 1, 2019 by the Board of Directors.

2. Basis of preparation

(1) Compliance with IFRS and matters related to first-time adoption thereof

The condensed consolidated financial statements of DOCOMO meet the requirements of the “Specified Companies Complying with Designated International Accounting Standards” under Article 1-2 of the “Ordinance on Terminology, Forms, and Preparation Methods of Quarterly Consolidated Financial Statements” (Cabinet Office Ordinance No. 64 of 2007), and thus were prepared in accordance with IAS 34 “Interim Financial Reporting,” pursuant to the provisions of Article 93 of the aforementioned Ordinance.

DOCOMO adopted IFRS for the first time in the first quarter ended June 30, 2018 (from April 1, 2018 to June 30, 2018), and the date of transition to IFRS (the “transition date”) is April 1, 2017. As for the impact of the transition to IFRS on DOCOMO’s financial condition, results of operations and cash flow conditions, please refer to Note 15 “First-time adoption (disclosure regarding the transition to IFRS).”

The accounting policies of DOCOMO are based on IFRS effective as of December 31, 2018, excluding the provisions of IFRS that are not early adopted and the exemptions permitted under IFRS 1 “First-time Adoption of International Financial Reporting Standards” (revised in November 2008) (“IFRS 1”).

(2) Basis of measurement

As stated in Note 3 “Significant accounting policies,” the condensed consolidated financial statements are prepared on a historical cost basis, except for financial instruments measured at fair value as well as assets and liabilities associated with post-employment benefit plans, etc.

(3) Function and presentation currency

The condensed consolidated financial statements are presented in Japanese yen, the currency prevailing in the main economic domain in which the Company conducts its business activities (“functional currency”), and figures less than a million yen are rounded to the nearest million yen.

(4) Changes in accounting policies

DOCOMO has adopted IFRS 9 “Financial Instruments” (revised in July 2014) (“IFRS 9”) from the beginning of the nine months ended December 31, 2018 (April 1, 2018).

With respect to the changes in accounting policies following IFRS 9, comparative information is not restated, in accordance with the exemptions under IFRS 7 “Financial Instruments: Disclosures” (revised in July 2014) (“IFRS 7”) and IFRS 9, which are based on IFRS 1. U.S. Generally Accepted Accounting Principles (“U.S. GAAP”) are applied at the transition date, the end of the previous fiscal year, and the nine months ended December 31 of the previous fiscal year, and the difference between U.S. GAAP-based carrying amounts, and IFRS 9-based carrying amounts at the beginning of the nine months ended December 31, 2018 is accounted for as adjustments to retained earnings, other components of equity.

Although equity securities for which fair values are not readily determinable were measured using the cost method under U.S. GAAP, following the adoption of IFRS 9 at the beginning of the nine months December 31, 2018, they were designated as items to be measured at fair value through other comprehensive income, and changes in their fair value are recorded in “Other comprehensive income (net of taxes)” in the condensed consolidated statement of comprehensive income. Otherwise, the impact of adopting IFRS 9 is immaterial.

Cumulative effects of the adoption of IFRS 9 on the condensed consolidated statement of financial position at the beginning of the nine months ended December 31, 2018 are an increase of ¥4,397 million in “Investments accounted for using equity method,” an increase of ¥11,190 million in “Securities and other financial assets,” a decrease of ¥3,435 million in “Deferred tax assets,” an increase of ¥116 million in “Other non-current liabilities,” an increase of ¥2,665 million in “Retained earnings,” and an increase of ¥9,371 million in “Other components of equity.” The impact on “profit” and “basic earnings per share” for the nine months ended December 31, 2018 is immaterial.

Significant accounting policies based on U.S. GAAP at the transition date, the end of the previous fiscal year and in the nine months ended December 31 of the previous fiscal year, as well as significant accounting policies in the fiscal year ending March 31, 2019 are stated in Note 3 “Significant accounting policies (3) Financial instruments.”

3. Significant accounting policies

DOCOMO's significant accounting policies are as follows. Unless otherwise stated, they are applicable during all periods presented in the condensed consolidated financial statements (including the consolidated statement of financial position at the date of transition to IFRS).

The exemptions under IFRS 1 adopted by DOCOMO in transitioning from U.S. GAAP to IFRS are described in Note 15 "First-time adoption (disclosure regarding the transition to IFRS)."

(1) Basis of consolidation

DOCOMO's consolidated financial statements include the financial statements of the Company and its subsidiaries and equity interests of its associates.

1) Subsidiaries

Subsidiaries are companies over which DOCOMO has control. Control is achieved if DOCOMO has power over the investee, or has exposure or rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

The financial statements of subsidiaries are included in the consolidated financial statements from the day DOCOMO gains control to the date of loss of control. Any changes in DOCOMO's interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions, and the difference between the adjustment to noncontrolling interests and the fair value of the consideration is directly recognized as equity attributable to the shareholders of the Company. In the event of loss of control, gains or losses arising from the loss of control are recognized in profit or loss. The balance of bonds and debts and transactions within DOCOMO as well as unrealized gains or losses arising from transactions within DOCOMO are eliminated in preparing the consolidated financial statements.

2) Associates

Associates are companies over which DOCOMO has significant influence over financial and operating policies but does not have control or joint control. Investments in associates are accounted for using the equity method.

Investments in associates are recognized at initial cost, including transaction costs. Furthermore, DOCOMO's interests in profit or loss and other comprehensive income of associates from the date DOCOMO gains significant influence to the date of loss of such significant influence are recorded in "share of profits (losses) on equity method investments" in the condensed consolidated statement of profit or loss and "other comprehensive income (net of taxes)" in the condensed consolidated statement of comprehensive income as a change in the amount of investment in associates.

The accounting policies of the companies to which the equity method is applied are revised as necessary in order to make them consistent with the accounting policies applied by DOCOMO.

The consolidated financial statements include investments accounted for using the equity method with different reporting dates, as it is impractical to set them on the same date as the Company's reporting date due to relationships with other shareholders and other factors. Most of the reporting dates of the companies to which the equity method is applied are December 31. Adjustments have been made to the impact of significant transactions or events that occurred between the Company's reporting date and the reporting dates of the companies to which the equity method is applied.

DOCOMO's investments in associates include goodwill recognized at the time of acquisition. As such, goodwill is not recognized separately from the entire investment and is therefore not separately tested for impairment. Instead, the entire investments accounted for using the equity method are tested for impairment by considering investments in associates as a single asset.

If DOCOMO's share in losses exceeds the investments accounted for using the equity method, such that the carrying amount of the investments is reduced to zero, any further loss is not recognized unless DOCOMO bears obligations on behalf of the investees.

(2) Foreign currency translation

1) Transactions in foreign currency

Transactions denominated in foreign currencies, especially, transactions in currencies other than the functional currency of each company, are translated into functional currencies based on exchange rates at the transaction date. Foreign currency-denominated monetary assets and liabilities are translated into functional currency at the exchange rate at the end of the reporting period, and foreign currency denominated non-monetary assets and liabilities measured at fair value are translated into functional currency at the exchange rate as of the fair value measurement date. Translation differences are recognized as profit or loss. However, for equity financial assets, whose fair value changes after acquisition are recorded in other comprehensive income, the translation differences are recorded in other comprehensive income.

In addition, non-monetary items denominated in foreign currencies measured at cost are translated using the exchange rate at the transaction date.

2) Foreign operations

Assets and liabilities of a foreign operation are translated into the presentation currency using the exchange rate at the end of the reporting period, while profit and loss and cash flows are translated into the presentation currency using the exchange rate at the transaction date or the average exchange rate for the period that approximates the exchange rate at the transaction date. The resulting translation differences are recorded in "foreign exchange translation differences" in the condensed consolidated statement of comprehensive income and "effect of exchange rate changes on cash and cash equivalents" in the condensed consolidated statement of cash flows.

In the event of a disposal of the entire interests in a foreign operation or a disposal of part of interests accompanying a loss of control or significant influence, the cumulative translation differences are transferred from other comprehensive income to profit or loss.

(3) Financial instruments

For the transition date, the end of the previous fiscal year and the nine months ended December 31 of the previous fiscal year, the Company adopted the previous accounting principles (U.S. GAAP) pursuant to the exemptions from applying IFRS 7 and IFRS 9 based on IFRS 1. IFRS 7 and IFRS 9 were applied during the nine months ended December 31, 2018. The accounting policies are as follows.

1) Accounting policies that were applied before April 1, 2018

Receivables held for sale—

Accounts receivable for DOCOMO's telecommunications services, installment receivables for customers' equipment purchases and other receivables ("receivables for telecommunications services") that DOCOMO has decided to sell are included in "trade and other receivables" and "securities and other financial assets" in the condensed consolidated statement of financial position.

Receivables held for sale are measured at the lower of cost and fair value, and the portion of the cost exceeding the fair value is recorded as a valuation allowance in "trade and other receivables" and "securities and other financial assets" in the condensed consolidated statement of financial position.

In addition, the aggregate amount of losses on sales of receivables for telecommunications services and adjustments to the fair value of receivables held for sale are recorded as “operating expenses” in the condensed consolidated statement of profit or loss.

Marketable securities and other investments—

Marketable securities comprise debt and equity securities. DOCOMO determines the appropriate classification of these securities at the time of acquisition. Regarding marketable securities, DOCOMO periodically reviews the need for impairment in case where there is an other-than-temporary decline in the carrying amount. If this evaluation indicates that a decline in value is other than temporary, the security is written down to its fair value. Valuation loss is recognized in profit or loss and the amount after recognizing the valuation loss becomes the new cost. To determine whether a decline in value is other than temporary, DOCOMO considers whether it has the ability and intent to hold the investment until the fair value recovers or whether the reasons indicating that the cost of the investment is recoverable outweighs the reasons to the contrary. The factors considered in this assessment include the reasons for the decline in value, the degree and duration of the decline, changes in value subsequent to year-end, forecast earnings performance of the investee and the general market condition in the geographical area or industry in which the investee operates.

Equity securities held by DOCOMO, whose fair values are readily determinable, are classified as available-for-sale securities. Available-for-sale equity securities are measured at fair value with unrealized holding gains or losses, net of applicable taxes, included in “other components of equity” in the condensed consolidated statement of financial position. Realized gains and losses are determined using the average cost method and are recognized in profit or loss when realized.

Equity securities whose fair values are not readily determinable are accounted for by the cost method and included in “securities and other financial assets.” Valuation loss is recognized if there is an other-than-temporary decline in value. Realized gains and losses are determined using the average cost method and are recognized in profit or loss when realized.

Allowance for doubtful accounts—

Allowance for doubtful accounts is computed based on the historical bad debt experience and the estimated uncollectible amount based on the analysis of certain individual accounts, including claims in bankruptcy.

2) Accounting policies that were applied on and after April 1, 2018

Financial assets are classified at initial recognition as financial assets measured at amortized cost, financial assets measured at fair value through other comprehensive income and financial assets measured at fair value through profit or loss. DOCOMO initially recognizes trade receivables and other receivables measured at amortized cost on the date of occurrence and other financial assets on the transaction date.

Financial assets are derecognized if a contractual right to cash flows of a financial asset expires or if a contractual right to receive cash flows from a financial asset is transferred and substantially all of the risks and rewards of ownership of the financial asset are transferred.

Financial assets measured at amortized cost—

Financial assets that meet both of the following conditions are categorized as financial assets measured at amortized cost.

- The financial assets are held within a business model whose objective is to hold financial assets in order to collect contractual cash flows.
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

As of financial assets measured at amortized cost, trade receivables from contracts with customers are measured at transaction price while all the others are measured at fair value plus the transaction costs directly attributable to the acquisition at the initial recognition. After the initial recognition, they are measured at amortized cost after subtracting the loss allowance from the total carrying amount calculated based on the effective interest rate method.

No financial assets are held within a business model whose objective is both to collect contractual cash flows and sell financial assets.

Equity financial instruments measured at fair value through other comprehensive income—

Investments in equity financial instruments that are not held for trading purposes may be designated irrevocably to present the subsequent changes in fair value in other comprehensive income, and DOCOMO makes this designation for each financial instrument.

Equity financial instruments measured at fair value through other comprehensive income are measured at initial recognition at fair value plus the transaction cost directly attributable to the acquisition. After the initial recognition, these are measured at fair value and subsequent changes are recognized in other comprehensive income. When the amount recognized as other comprehensive income is derecognized, the cumulative amounts are transferred to retained earnings and are not transferred to profit or loss. Dividends are recognized in profit or loss.

Financial assets measured at fair value through profit or loss—

Financial assets other than the above are classified as financial assets measured at fair value through profit or loss.

Financial assets measured at fair value through profit or loss are measured at fair value at the time of their initial recognition, and transaction costs directly attributable to the acquisition are recognized in profit or loss when incurred. After the initial recognition, these are measured at fair value and the subsequent changes are recognized as profit or loss.

Impairment of financial assets—

As for financial assets measured at amortized cost, DOCOMO records loss allowance of financial assets based on expected credit losses.

If the credit risk on the financial instrument has not significantly increased since the initial recognition at the end of the period, the amount of the loss allowance is calculated using expected credit losses (12-month expected credit losses) arising from all default events that are possible within 12 months from the reporting date. If at the end of the period, the credit risk on the financial instruments has significantly increased since the initial recognition, the amount of loss allowance is calculated using expected credit losses arising from all possible default events over the expected life of the financial instruments (expected credit losses for the entire period).

However, regardless of the above, for trade receivables and other receivables that do not contain material financial factors and other financial assets (lease receivables), the amount of valuation loss allowance is always calculated using the expected credit losses of the entire period.

Financial liabilities—

Financial liabilities are classified at the time of initial recognition as financial liabilities measured at fair value through profit or loss and financial liabilities measured at amortized cost. Debt financial instruments issued by DOCOMO are initially recognized at the issue date, and other financial liabilities are initially recognized at the transaction date.

Financial liabilities are derecognized when the financial liabilities are extinguished, i.e. when the obligation in the contract is discharged or cancelled or expires.

Financial liabilities measured at amortized cost—

Financial liabilities other than financial liabilities measured at fair value through profit or loss are classified as financial liabilities measured at amortized cost. Financial liabilities measured at amortized cost are measured at the time of initial recognition at fair value minus transaction costs directly attributable to the liability. After the initial recognition, these are measured at amortized cost based on the effective interest rate method.

(4) Put options granted to noncontrolling interests

For the written put option of the subsidiaries' shares granted to the owner of noncontrolling interests by DOCOMO, in principle, DOCOMO initially recognizes the present value of the redemption amount as other financial liabilities, and the same amount is subtracted from additional paid-in capital. After the initial recognition, it is measured at amortized cost based on the effective interest rate method, and subsequent changes are recognized as additional paid-in capital.

(5) Cash and cash equivalents

Cash and cash equivalents include bank deposits and short-term highly liquid investments with original maturities of three months or less.

(6) Inventories

Inventories mainly comprise handsets and accessories and are measured at the lower of cost or net realizable value. Costs include purchase costs and all other costs incurred until the inventory has reached the current location and condition. Net realizable value is calculated by subtracting the estimated cost required for sale from the estimated selling price in the ordinary course of business. The first-in, first-out method is adopted as the method of calculating the cost of handsets.

(7) Property, plant and equipment

1) Recognition and measurement

Property, plant and equipment are measured at costs less any accumulated depreciation and accumulated impairment losses.

Acquisition cost includes costs directly related to the acquisition of the assets, dismantling and removal costs of the assets, estimates of restoration costs, and borrowing costs that satisfy the requirements for capitalization. If the useful lives of the components of property, plant and equipment are different for each component, the components are depreciated separately.

2) Expenditures after acquisition

Of the expenditures incurred after acquiring an item of property, plant and equipment, expenditures for regular repairs and maintenance are recognized as expenses when incurred, and expenditures for major replacement and improvement are capitalized only when it is probable that any associated future economic benefits would flow to DOCOMO.

3) Depreciation and amortization

Property, plant and equipment other than land and construction in progress are depreciated using the straight-line method over their estimated useful lives starting from the time they become available for use. The estimated useful lives are determined at the time assets are acquired based on the expected period of use, estimated useful lives of similar assets used in the past and anticipated technological or other changes. If technological or other changes occur more or less rapidly or in a different form than anticipated or the intended use changes, the useful lives assigned to these assets are adjusted as appropriate. The estimated useful lives of major property, plant and equipment are as follows.

Major wireless telecommunications equipment	9 to 16 years
Steel towers and poles for antenna equipment	30 to 40 years
Reinforced concrete buildings	42 to 56 years
Tools, furniture and fixtures	4 to 15 years

The depreciation method, residual values and useful lives are reviewed annually and adjusted as necessary.

When depreciable telecommunications equipment is retired or abandoned in the normal course of business, the amounts of such telecommunications equipment and its accumulated depreciation are deducted from the respective accounts. Any remaining balance is charged to expense immediately.

(8) Goodwill and intangible assets

1) Goodwill

In a business combination, if the total amount of fair value of consideration paid, the amount of noncontrolling interests of the acquiree, and, in case of a step acquisition, fair value of the existing interest at the acquisition date exceeds the net value of identifiable assets and liabilities assumed at the acquisition date, the excess is recognized as goodwill. If the total amount of consideration is lower than the net value of identifiable assets and liabilities, the difference is recognized as a gain in profit or loss.

Goodwill is not amortized but allocated to a cash-generating unit or a group of cash-generating units based on the area and type of business. An impairment test is performed at the same time every year or whenever there is any indication that it may be impaired. Impairment loss on goodwill is recognized in profit or loss, and is not reversed.

After the initial recognition, goodwill is presented as costs less accumulated impairment losses.

2) Intangible assets

Intangible assets are measured at costs less any accumulated amortization and accumulated impairment losses.

Individually acquired intangible assets are measured at cost, and the cost of intangible assets acquired in a business combination is measured at fair value as of the date of the business combination.

DOCOMO capitalizes expenditure on development activities only when there is a technical and commercial feasibility of completing the development, DOCOMO has intention, ability and sufficient resources to use the outcome of the development, it is probable that the outcome will generate a future economic benefit, and the cost can be measured reliably. The total amount of expenditure incurred from the day when all of the above recognition conditions are satisfied for the first time to the completion of development is recorded as intangible assets.

Costs for acquisition and development of software for internal use are recorded as intangible assets if future economic benefits are expected to flow to DOCOMO.

Intangible assets for which useful lives can be determined mainly comprise software for the telecommunications network, software for internal-use, software acquired for manufacturing handsets and the rights to use telecommunications facilities of wireline operators, and these are amortized using the straight-line method over their estimated useful lives. The estimated useful lives of major intangible assets are as follows:

- Software: 7 years maximum
- Rights to use telecommunications facilities of wireline operators: 20 years

Intangible assets with indefinite useful lives or intangible assets not yet available for use (mainly spectrum related assets) are not amortized, and an impairment test is performed at the same time every year or whenever there is any indication that these may be impaired.

The depreciation method, residual values and useful lives are reviewed annually and adjusted as necessary.

(9) Impairment of property, plant and equipment, goodwill and intangible assets

DOCOMO assesses whether there is any indication of impairment of property, plant and equipment, goodwill or intangible assets.

An impairment test is performed whenever there is any indication that an asset may be impaired, and the recoverable amount for each individual asset or a cash-generating unit is measured. In addition, goodwill, intangible assets for which useful lives cannot be determined, and intangible assets that are not yet usable are not amortized, and an impairment test is performed at the same time every year or whenever there is any indication that the intangible assets may be impaired.

As the corporate assets of DOCOMO do not generate independent cash inflows, these are allocated to relevant cash-generation units. Whenever there is any indication that a corporate asset allocated to each cash-generating unit may be impaired, the recoverable amount of the cash-generating unit to which DOCOMO's assets belong is estimated.

The recoverable amount is the higher of the fair value less costs of disposal or value in use measured by evaluating future cash flows expected to be generated from the continuing use and from the ultimate disposal of the asset discounted at an appropriate discount rate.

If the carrying amount of an individual asset or a cash-generating unit exceeds the recoverable amount, an impairment loss is recognized in profit or loss and the carrying amount of the asset or the cash-generating unit is reduced to the recoverable amount. The impairment loss recognized in connection with the cash-generating unit is allocated first so as to reduce the carrying amount of the goodwill allocated to that unit, and then the carrying amount of the other assets within the cash-generating unit is reduced proportionally.

Impairment loss on goodwill is not reversed. As for impairment loss on non-financial assets other than goodwill, the recoverable amount of the asset is estimated if there is any indication that an impairment loss may no longer exist or may have decreased. Impairment loss is reversed, if the recoverable amount exceeds the carrying amount after impairment. The reversal of impairment loss is recognized in profit or loss to the extent that it does not exceed the carrying amount that would have been determined had no impairment loss been recognized in the past.

(10) Employee benefits

DOCOMO has adopted a defined benefit plan and a defined contribution plan as post-employment benefit plans for its employees.

1) Defined benefit plan

The present value of defined benefit obligations and related current and past service costs are calculated using the projected unit credit method.

Discount rates are determined in accordance with the market yield of high quality corporate bonds as of the end of the period for the estimated term of the obligation.

Net defined benefit asset or liability is the present value of defined benefit obligations less the fair value of plan asset. Service costs and net interest on the net defined benefit liability (asset) are recognized in profit or loss.

Changes arising from remeasurement of defined benefit plans are recognized in other comprehensive income in its entirety in the period of occurrence and are immediately transferred to retained earnings. All past service costs are recognized in profit or loss when incurred.

2) Defined contribution plan

With regard to defined contribution plans, the amount to be paid for the plan is recognized as an expense when an employee renders related services.

(11) Provisions

Provisions are recognized when DOCOMO has a present legal obligation or constructive obligation as a result of past events, it is probable that an outflow of resources with economic benefits in order to settle the obligation, and it is possible to reliably estimate the amount of the resource outflow.

DOCOMO mainly records provisions for point programs (details are stated in (13) Point program).

(12) Revenue from contracts with customers

Revenue is measured based on the amount of consideration to which it expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties. DOCOMO recognizes revenue when the performance obligation of a product or service is satisfied by transferring the control over the promised goods or service to a customer.

DOCOMO offers telecommunications services, equipment sales and other services in three reportable segments, namely the Telecommunications business, Smart Life Business and Other Businesses. Details are stated in Note 6 “Segment reporting” for reportable segments, and Note 11 “Revenue from contracts with customers” for details of products and services.

Furthermore, DOCOMO provides point programs to customers (details are stated in (13) Point program).

1) Telecommunications services

i) Mobile communications services

The main service in telecommunications services is mobile communications services. Mobile communications service is sold to subscriber directly or through third-party resellers who act as agents.

DOCOMO sets its mobile communications services rates in accordance with the Japanese Telecommunications Business Act and government guidelines, which currently allow wireless telecommunications operators to set their own tariffs without government approval. The performance obligation of mobile communications services is identified as the provision of communication lines and voice calls and packet communications using the lines to customers in accordance with contracts. Mobile communications services revenues primarily consist of basic monthly charges, airtime charges and fees for activation.

DOCOMO deems the performance obligation to be satisfied according to the usage of voice communications and packet communications, and records basic monthly charges and airtime charges as revenue each month accordingly. The amounts recorded as revenue are charged on a monthly basis and collected in a short period. Some of DOCOMO’s billing plans generally include a certain amount of allowances (free minutes and/or packets) determined as up to fixed charge of each billing plan, and the amount of unused allowances are automatically carried over to the following month. In these services, DOCOMO records the amount of unused allowances which is expected to be used in the following or subsequent months by subscribers as a “contract liability” and recognizes it as revenue when DOCOMO satisfies the performance obligation, namely, the amount of unused allowance is used by subscribers.

Fees for activation on which DOCOMO grants customers with material rights on renewal are deferred as a "contract liability" in the condensed consolidated statement of financial position and are recognized as revenue over a period during which DOCOMO provides customers with material rights.

ii) Optical-fiber broadband service and other telecommunications services

DOCOMO provides an optical-fiber broadband service by utilizing the wholesale optical-fiber access service of NIPPON TELEGRAPH AND TELEPHONE EAST CORPORATION ("NTT EAST") and NIPPON TELEGRAPH AND TELEPHONE WEST CORPORATION ("NTT WEST"), subsidiaries of NTT. To provide the optical-fiber broadband service is identified as the performance obligation to subscribers in accordance with contracts. The performance obligation is deemed to be satisfied according to the usage of the optical-fiber broadband service.

Furthermore, DOCOMO sells optical-fiber broadband service and packet communications plan service offered in a bundled arrangement, as well as separately, which enables subscribers to receive discount charges. Therefore, each service has a respective stand-alone selling price. The total consideration of a bundle contract is allocated to their respective performance obligations based on the ratio of their stand-alone selling prices, and recognized as revenue in "optical-fiber broadband service and other telecommunications services revenues" and "mobile communications services revenues" at the time each performance obligation is deemed to be satisfied.

Construction fees and fees for activation for the optical-fiber broadband service, on which DOCOMO grants customers with material rights on renewal are deferred as a "contract liability" in the condensed consolidated statement of financial position and are recognized as revenue over a period during which DOCOMO provides customers with material rights.

2) Equipment sales

DOCOMO purchases from handset manufacturers, the types of handsets compatible with its mobile communications services, which are then distributed mainly to agent resellers for sale to our customers. Regarding equipment sales, the performance obligation is deemed to be satisfied when the equipment is transferred to agent resellers and revenues are recognized accordingly. Certain commissions paid to agent resellers and incentives offered to customers are recognized as a reduction of revenue upon delivery of the equipment to such agent resellers.

3) Others

As for other services, DOCOMO provides a variety of services, including distribution of video, music, and electronic books, finance/payment services, shopping services, various other services to support our customers' daily lives, and mobile device protection service.

DOCOMO deems the performance obligation to be satisfied when the transfer of services is completed or the goods are accepted by a customer, and recognizes revenue accordingly.

(Presentation as a gross amount or net amount)

DOCOMO evaluates whether it is appropriate to record the gross amount of the revenues and the costs of sales for transferred goods and services by considering factors including, but not limited to, whether DOCOMO is primarily responsible for fulfilling the contract, has the inventory risk, and has discretion in establishing prices. When DOCOMO has the inventory risk, has discretion in establishing prices, or is primarily responsible for fulfilling the contract, related revenues are presented on a gross basis.

Meanwhile, in certain transactions when DOCOMO is not considered to be primarily responsible for fulfilling the contract, does not take or takes little inventory risk, and has no or little discretion in establishing prices, DOCOMO is considered an agent for such transactions and related revenues are presented on a net basis.

(Contract costs)

DOCOMO capitalizes the recoverable portion of the incremental costs of obtaining a contract with customers and costs to fulfill contracts, and presents them as “contract costs” in the condensed consolidated statement of financial position. Incremental costs of obtaining a contract with a customer refer to the costs that DOCOMO incurs in order to obtain a contract with a customer, which would not otherwise have been incurred if DOCOMO had not obtained the contract. Costs to fulfill contracts refer to the costs generate or enhance resources of the DOCOMO that will be used in satisfying (or in continuing to satisfy) performance obligation in the future.

DOCOMO capitalized the incremental costs of obtaining a contract which consist mainly of commissions paid to agent resellers for acquiring customers. Costs to fulfill contracts consist primarily of costs pertaining to Subscriber Identity Module (SIM) cards for the mobile communications services and construction fees of the “Docomo Hikari” service, both of which are incurred at the inception of contracts. The contract costs are amortized when revenues from related services are recognized. However, the costs incurred are recorded as an expense if the amortization period of the costs is one year or less.

DOCOMO assesses, on a quarterly basis, the recoverability of the asset which is generated from contract costs. DOCOMO records impairment loss in profit or loss when the remaining amount of consideration that DOCOMO expects to receive in exchange for the goods or services to which the asset relates is less than the total of the carrying amount of relevant contract assets and the amount of the costs that relates directly to providing those goods or services and that have not been recognized as an expense.

(13) Point program

DOCOMO offers “d POINT Service,” which provides individual customers with points that may be earned through, among others, mobile phone usage, making payments with “d CARD” or “DCMX” credit cards, or purchasing goods or services at our partner stores. These points may be exchanged for payments on DOCOMO’s products and mobile phone charges, and payments at DOCOMO’s partner stores. Individual customers may continue using “d POINTs” subsequent to the cancellation of DOCOMO’s mobile communications services contract.

In addition, DOCOMO offers “docomo Points Service,” which provides corporate customers with points according to usage of DOCOMO’s mobile phones and other services. Points that customers have received can be appropriated for payment on DOCOMO’s products.

DOCOMO recognizes the points expected to be used by customers in the future out of “docomo Points” and “d POINTs” that it has promised to provide to customers in contracts concluded with them as the performance obligation, and records them as “contract liability” in the condensed consolidated statement of financial position. DOCOMO allocates the transaction price to the performance obligation related to these points and the performance obligation associated with goods or services to which points are earned, based on the ratio of respective stand-alone selling prices. Transaction prices allocated to the performance obligation of points and recorded in “contract liability” are recognized as revenue according to the usage of points.

Meanwhile, points that do not impose any performance obligation in contracts are recognized and presented as “provisions.”

(14) Finance income and finance costs

Finance income comprises interest income, dividend income, foreign exchange gains, and other items. Interest income is recognized using the effective interest rate method when incurred. Dividend income is recognized when the right of DOCOMO to receive payment is established.

Finance costs comprise interest expense, foreign exchange losses, derivative losses, and other items. Interest expense is recognized using the effective interest rate method when incurred.

(15) Income taxes

Income taxes are presented as the total of current tax and deferred tax.

Current tax is calculated using the tax rate that has been enacted, or has substantially been enacted, as of the end of the period, as an amount expected to be paid to or refunded by the tax authorities. These taxes are recognized as profit or loss for the period, excluding items related to business combinations, items recognized in other comprehensive income and items recognized directly in equity.

Deferred tax is recognized for the temporary differences between the carrying amounts of assets and liabilities in the consolidated statement of financial position and their respective tax bases, and the estimated tax effects in the future resulting from the carryforward of unused tax losses and tax credits. Deferred tax assets and liabilities are measured using the effective tax rates expected to be applied at the time the temporary differences are expected to be reversed. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in profit or loss for the period in which the new tax rate is enacted or substantially enacted, excluding deferred tax assets related to items previously recognized outside profit or loss and liabilities arising out of other components of equity. Deferred tax assets are recognized for deductible temporary differences, and the carryforward of unused tax losses and unused tax credits to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences, the unused tax losses and unused tax credits can be utilized.

Deferred tax assets or liabilities are not recognized with regard to temporary differences arising not from business combination but from the initial recognition in a transaction that does not affect either accounting profit or taxable income when the transaction is conducted. Furthermore, deferred tax liabilities are not recognized with regard to taxable temporary differences resulting from the initial recognition of goodwill.

Deferred tax liabilities are recognized with regard to taxable temporary differences related to investments in subsidiaries and associates. However, deferred tax liabilities are not recognized if it is possible to control the timing of the reversal of temporary differences and it is probable that the temporary difference will not reverse in the foreseeable future. In addition, with regard to deductible temporary differences related to investments in subsidiaries and associates, deferred tax assets are recognized only to the extent that it is probable that the temporary difference will reverse in the foreseeable future and future taxable profit will be available.

Deferred tax assets and deferred tax liabilities are offset when DOCOMO has a legally enforceable right to offset current tax assets against current tax liabilities, and when they relate to income taxes levied by the same taxation authority on the same taxable entity.

(16) Earnings per share

Basic earnings per share are computed by dividing profit available to common shareholders by the weighted average number of shares of common stock outstanding for each period, without considering the dilution effect. Diluted earnings per share assume the dilution that could occur if stock options are exercised, common shares are issued by converting convertible bonds or through other means.

DOCOMO did not issue potentially dilutive common shares during the fiscal year ended March 31, 2018 and the nine months ended December 31, 2018, and therefore there is no difference between basic earnings per share and diluted earnings per share.

4. Significant accounting estimates and judgments requiring estimates

The preparation of DOCOMO's condensed consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions, which should affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the end of the third quarter ended December 31, 2018, as well as the reported amounts of revenues and expenses during the nine months ended December 31, 2018. The actual results may differ from those estimates. DOCOMO has identified the following areas where it believes the estimates and assumptions are particularly critical to the condensed consolidated financial statements. These are depreciation and amortization of property, plant and equipment, internal use software and other intangible assets; impairment of property, plant and equipment, goodwill, intangible assets, and contract costs; point programs; defined benefit liability; and revenue recognition.

5. New standards not yet adopted

Of the standards and interpretations newly issued or revised in the period up to the date of approval of the condensed consolidated financial statements, those that have not been early adopted by the Company, but are likely, if materialized, to have certain impact on the Company are as follows:

Standards	Title	Date of mandatory adoption (fiscal year of mandatory IFRS adoption)	Fiscal year of scheduled adoption by the Company	Summary of newly introduced/revised standards and interpretations	Potential impact on consolidated financial statements
IFRS 16	Leases	January 1, 2019	Fiscal year ending March 31, 2020	IFRS 16 replaces hitherto adopted IAS 17, with the main revisions as follows. -Applying control model to identification of leases - Revision of the accounting treatment of lessees	While the lessee's assets and liabilities associated with the operating leases in particular are expected to increase as a result of these changes, the precise impact of the adoption on the Company's accounting is currently being estimated.

6. Segment reporting

(1) Outline of reportable segments

DOCOMO's chief operating decision maker (the "CODM") is its Board of Directors. The CODM evaluates the performance and makes resource allocations of its segments based on the information provided by DOCOMO's internal management reports.

DOCOMO has three business segments, which consist of telecommunications business, smart life business, and other businesses.

The telecommunications business segment includes mobile phone services (LTE(Xi) services and FOMA services), optical-fiber broadband services, satellite mobile communications services, international services and the equipment sales related to these services. The smart life business segment includes distribution services such as video, music and electronic books as well as finance/payment services, shopping services and various other services to support our customers' daily lives. The other businesses segment primarily includes "Mobile Device Protection Service," as well as development, sales and maintenance of IT systems.

(2) Information on operating revenue, income or loss for each reportable segment

DOCOMO's segment information is as follows.

Segment operating revenues:

	Millions of yen	
Nine Months Ended December 31	2017	2018
Telecommunications business-		
External customers	¥ 2,942,561	¥ **3,004,148**
Intersegment	1,113	**1,100**
Subtotal	2,943,674	**3,005,248**
Smart life business-		
External customers	325,389	**326,291**
Intersegment	11,188	**11,725**
Subtotal	336,577	**338,016**
Other businesses-		
External customers	321,801	**323,676**
Intersegment	4,720	**4,833**
Subtotal	326,522	**328,510**

Share of profits (losses) on equity method investments		3,367		**(564)**
Profit before taxes	¥	445,302	¥	**290,500**

(3) Information on products and services

For information concerning operating revenue from each service item as well as from equipment sales, please refer to Note 11 “Revenue from contracts with customers.”

7. Asset held for sale

As of April 1, 2017, March 31, 2018 and December 31, 2018, DOCOMO held 34% of the outstanding common shares of Sumitomo Mitsui Card Company, Limited. (“Sumitomo Mitsui Card”). Sumitomo Mitsui Card is a credit card operator in Japan and a privately held company.

In July 2005, DOCOMO entered into an agreement with Sumitomo Mitsui Card, Sumitomo Mitsui Financial Group, Inc. (SMFG) and Sumitomo Mitsui Banking Corporation to jointly promote credit transaction services which use mobile phones compatible with the “Osaifu-Keitai” (mobile wallet) service. The investment we made in Sumitomo Mitsui Card in accordance with this agreement had been accounted for using the equity method.

In September 2018, we entered into an agreement for new business cooperation with Sumitomo Mitsui Card and SMFG, under which DOCOMO and SMFG would pursue joint business development to further expand our “iD” electronic money service leveraging the customer base and know-how of the two companies and thereby facilitate cashless payments, and look into the possibility of new ways of collaboration in the area of FinTech, etc. As a result of this arrangement, we agreed to sell all Sumitomo Mitsui Card shares in our possession to SMFG in April 2019.

Therefore, in accordance with IFRS 5 "Non-current Assets Held for Sale and Discontinued Operations,” DOCOMO reclassified its investment in Sumitomo Mitsui Card from "Investment accounted for using the equity method" to "Asset held for sale." In addition, the application of the equity method was discontinued and the asset was subsequently measured at the lower of its carrying amount and fair value less costs to sell. As a result, the asset is recorded at carrying amount at the time when the equity method was discontinued as of December 31, 2018.

Asset classified as "Asset held for sale" as of December 31, 2018 was as follows:

	Millions of yen	
	December 31, 2018	
Asset held for sale		
Investment in associate which had been accounted for by using equity method	¥	234,160
Total	¥	234,160

Cumulative other comprehensive income (net of taxes) related to "Asset held for sale" amounted to ¥47,765 million (credit) and was included in "Other components of equity" in the condensed consolidated statements of financial position as of December 31, 2018. All of this amount will not be recognized in profit or loss but will be directly reclassified to "Retained earnings" when the asset is sold.

In addition, "Deferred tax assets" decreased by ¥42,530 million due to change of tax rate applicable to temporary differences in the asset to reflect the tax consequences that DOCOMO expects to recover the carrying amount of its asset by sale.

The impacts from this change on our profit and comprehensive income for the nine months ended December 31, 2018 were as follows:

“Income taxes” in the condensed consolidated statements of profit or loss increased by ¥20,667 million, and "Share of other comprehensive income of investments accounted for using the equity method (Items that will not be reclassified to profit or loss)"(credit) in the condensed consolidated statements of comprehensive income decreased by ¥21,863 million, respectively.

8. Property, plant and equipment

The breakdown of property, plant and equipment at the transition date, the end of the previous fiscal year, and the end of the second quarter ended December 31, 2018 are as follows:

	Millions of yen		
	Date of transition to IFRS (April 1, 2017)	March 31, 2018	December 31, 2018
Wireless telecommunications equipment	¥ 5,069,008	¥ 5,115,564	¥ **5,168,691**
Buildings and structures	909,894	919,796	**922,078**
Tools, furniture and fixtures	454,072	458,319	**463,376**
Land	155,701	155,921	**155,958**
Construction in progress	205,300	203,146	**213,643**
Sub-total	6,793,974	6,852,746	**6,923,745**
Accumulated depreciation and amortization and accumulated impairment losses	(4,300,786)	(4,304,529)	**(4,347,913)**
Total property, plant and equipment, net	¥ 2,493,188	¥ 2,548,216	¥ **2,575,833**

9. Equity and other equity items

(1) Number of outstanding shares

The total number of outstanding shares is as follows.

(Shares)

	Number of authorized shares (common shares with no par value)	Number of issued shares (Note 1) (common shares with no par value)
Balance as of April 1, 2017	17,460,000,000	3,899,563,000
Changes during the period (Note 2)	—	—
Balance as of December 31, 2017	17,460,000,000	3,899,563,000
Changes during the period (Note 2)	—	(117,264,000)
Balance as of March 31, 2018	17,460,000,000	3,782,299,000
Changes during the period (Note 2)	—	—
Balance as of December 31, 2018	17,460,000,000	3,782,299,000

(Note 1) Issued shares at the transition date, the end of the previous fiscal year, and the nine months ended December 31, 2018, are all fully paid in.

(Note 2) Changes in the number of issued shares represent decreases due to the cancellation of treasury stock.

(2) Treasury stock

The number of treasury stock is as follows.

(Shares)

	Number of treasury stock
Balance as of April 1, 2017	194,977,467
Purchase (Note 3)	83
Retirement	—
Balance as of December 31, 2017	194,977,550
Purchase (Note 3)	111,400,937
Retirement	(117,264,000)
Balance as of March 31, 2018	189,114,487
Purchase (Note 3)	50
Retirement	—
Balance as of December 31, 2018	189,114,537

(Note 3)

On October 26, 2017, the Board of Directors resolved that NTT DOCOMO, INC. may repurchase up to 120 million outstanding shares of its common stock for an amount in total not exceeding ¥300,000 million during the period from October 27, 2017 through March 31, 2018

On December 11, 2017, the Board of Directors resolved that NTT DOCOMO, INC. may acquire up to 93,248,787 outstanding shares of its common stock by way of tender offer at an amount in total not exceeding ¥250,000 million from December 12, 2017 through January 15, 2018 and repurchased 75,678,037 shares of its common stock at ¥202,893 million. In addition, the Board of Directors also resolved that NTT DOCOMO, INC may acquire the shares of its common stock by way of repurchases on the Tokyo Stock Exchange for an amount in total not exceeding the amount from the next business day of following the expiration of the tender offer through March 31, 2018. NTT DOCOMO, INC. acquired 35,722,900 shares of its common stock at ¥97,107 million by way of repurchases on the market.

The aggregate number of shares acquired from our parent company, NIPPON TELEGRAPH AND TELEPHONE CORPORATION, was 74,599,000 shares and the amount in total was ¥200,000 million for the fiscal year ended March 31, 2018.

On October 31, 2018, the Board of Directors resolved that NTT DOCOMO, INC. may repurchase up to 260 million shares of its common stock for an amount in total not exceeding ¥ 600,000 million during the period from November 1, 2018 through March 31, 2019.

On November 6, 2018, the Board of Directors resolved that NTT DOCOMO, INC. may acquire up to 257,953,468 shares of its common stock for an amount in total not exceeding ¥600,000 million by way of tender offer from November 7, 2018 through December 7, 2018 and repurchased 257,953,469 shares of its common stock at ¥600,000 million on January 7, 2019.

NTT DOCOMO, INC. also carried out the compulsory acquisition of less-than-one-unit shares upon request.

(3) Other components of equity

Changes in other components of equity (after tax effect adjustment) are as follows:

Nine months ended December 31, 2017 (April 1, 2017 to December 31, 2017)

(Millions of yen)

	Unrealized holding gains (losses) of available-for-sale securities	Unrealized gains (losses) on cash flow hedges	Foreign currency translation adjustment	Pension liability adjustment	Total
Balance as of April 1, 2017	92,017	(294)	―	―	91,723
Amount arising during the period	21,146	(120)	(6,114)	(392)	14,520
Reclassification adjustment to condensed consolidated statement of profit or loss	391	48	―	―	439
Reclassification to retained earnings	―	―	―	392	392
Balance as of December 31, 2017	113,553	(365)	(6,114)	―	107,074

Nine months ended December 31, 2018 (April 1, 2018 to December 31, 2018)

(Millions of yen)

	Change in the fair value of financial assets measured at fair value through other comprehensive income (Note1,2)	Cash flow hedges	Foreign exchange translation differences	Remeasurements of defined benefit plans	Change in equity corresponding to treasury stock to be purchased (Note3)	Total
Balance as of March 31, 2018	106,732	(348)	(4,042)	―	―	102,342
Cumulative impact of adopting IFRS 9 “Financial Instruments”	9,309	62	―	―	―	9,371

Three months ended December 31, 2018 (October 1, 2018 to December 31, 2018)

(Millions of yen)

	Change in the fair value of financial assets measured at fair value through other comprehensive income (Note2)	Cash flow hedges	Foreign exchange translation differences	Remeasurements of defined benefit plans	Change in equity corresponding to treasury stock to be purchased (Note3)	Total
Balance as of September 30, 2018	118,349	(314)	(13,689)	－	－	104,346
Amount arising during the period	(5,122)	(6)	463	(188)	(600,000)	(604,852)
Reclassification to retained earnings	(391)	－	－	188	－	(203)
Balance as of December 31, 2018	112,837	(320)	(13,226)	－	(600,000)	(500,710)

(Note 1) The balance of “Unrealized holding gains (losses) of available-for-sale securities” is reclassified as of March 31, 2018 of “Change in the fair value of financial assets measured at fair value through other comprehensive income,” pursuant to the exemptions under IFRS 7 and IFRS 9, which are based on IFRS 1.

(Note 2) The balance of "Change in the fair value of financial assets measured at fair value through other comprehensive income" on December 31, 2018 includes amounts related to "Asset held for sale" under IFRS 5. For details, please refer to Note 7 "Asset held for sale."

(Note 3) Since payment for treasury stock had not been completed on December 31, 2018, the obligation to purchase the treasury stock is recognized in “Other financial liabilities” with a corresponding debit to equity in “Other components of equity.”

10. Dividends

Cash dividends paid

Cash dividends paid during the nine months ended December 31, 2017 and 2018

Resolution	Class of shares	Total cash dividends paid (Millions of yen)	Cash dividends per share (Yen)	Date of record	Date of payment
The general meeting of shareholders on June 20, 2017	Shares of common stock of the Company	148,183	40	March 31, 2017	June 21, 2017
The board of director on October 26, 2017	Shares of common stock of the Company	185,229	50	September 30, 2017	November 21,2017
The general meeting of shareholders on June 19, 2018	Shares of common stock of the Company	179,659	50	March 31, 2018	June 20, 2018
The board of director on October 31, 2018	Shares of common stock of the Company	197,625	55	September 30, 2018	November 22, 2018

11. Revenue from contracts with customers

Disaggregation of revenue

The following tables show revenue disaggregated by type of goods and services. These tables also include reconciliation of DOCOMO's three reportable segments.

Nine months ended December 31, 2017 (April 1, 2017 – December 31, 2017) (Millions of yen)

	Telecommunications business	Smart life business	Other businesses	Elimination	Total
Telecommunications services	2,294,290	4,560	31,836	—	2,330,686
Mobile communications services revenues	2,132,763	4,560	30,167	—	2,167,491
Optical-fiber broadband service and other telecommunications services revenues	161,527	—	1,669	—	163,196
Equipment sales	602,181	52	1,462	—	603,695
Other operating revenues	47,203	331,964	293,224	(17,021)	655,370
Total	2,943,674	336,577	326,522	(17,021)	3,589,751

Nine months ended December 31, 2018 (April 1, 2018 – December 31, 2018) (Millions of yen)

	Telecommunications business	Smart life business	Other businesses	Elimination	Total
Telecommunications services	2,317,806	3,391	36,581	—	2,357,777
Mobile communications services revenue	2,110,243	3,391	34,137	—	2,147,771
Optical-fiber broadband service and other telecommunications services revenues	207,562	—	2,444	—	210,006
Equipment sales	649,033	45	1,018	—	650,096
Other operating revenues	38,409	334,580	290,911	(17,658)	646,243
Total	3,005,248	338,016	328,510	(17,658)	3,654,116

Three months ended December 31, 2017 (October 1, 2017 – December 31, 2017) (Millions of yen)

	Telecommunications business	Smart life business	Other businesses	Elimination	Total
Telecommunications services	768,901	1,282	10,393	—	780,576
Mobile communications services revenues	710,443	1,282	10,114	—	721,839
Optical-fiber broadband service and other telecommunications services revenues	58,458	—	278	—	58,736
Equipment sales	284,387	18	304	—	284,709
Other operating revenues	20,764	113,278	102,047	(6,106)	229,983
Total	1,074,052	114,578	112,744	(6,106)	1,295,268

Three months ended December 31, 2018 (October 1, 2018 – December 31, 2018) (Millions of yen)

	Telecommunications business	Smart life business	Other businesses	Elimination	Total
Telecommunications services	772,140	1,087	12,649	—	785,876
Mobile communications services revenue	699,742	1,087	11,815	—	712,644
Optical-fiber broadband service and other telecommunications services revenues	72,398	—	835	—	73,233
Equipment sales	259,499	15	190	—	259,704
Other operating revenues	12,769	114,232	97,550	(5,537)	219,014
Total	1,044,408	115,334	110,390	(5,537)	1,264,595

Telecommunications services revenues consist of revenue from mobile communications services, optical-fiber broadband service and other telecommunications services.

- Revenue from mobile communications service primarily consist of basic monthly charges, airtime charges and fees for activation.
- Revenue from optical-fiber broadband services and other telecommunications services include revenues from optical-fiber broadband service, satellite mobile communications services, overseas cable television services and other telecommunications services.

Equipment sales revenue includes revenues from the distribution of handsets mainly to agent resellers for sale to our customers. DOCOMO purchases from handset manufacturers, the handsets compatible with its mobile communications services. The cost of equipment sold stood at ¥613,374 million for the nine months ended December 31, 2017 and ¥634,142 million for the nine months ended December 31, 2018, ¥276,998 million for the three months ended December 31, 2017 and ¥250,310 million for the three months ended December 31, 2018 respectively, which are included within "Cost of equipment sold and services, and other expenses" under operating expenses in the condensed consolidated statement of profit or loss.

When a subscriber purchases a handset from agent resellers, the option to pay in installments is made available to the subscriber. If a subscriber chooses to pay in installments, under the agreement entered into among the subscriber, the agent resellers and us, we provide funds by paying for the purchased handset to the agent resellers and include the installment charge for the purchased handset in the monthly bill for network usage for the installment payment term. Uncollected cash payment is recorded within "trade and other receivables" if it is due for collection in one year or less and within "Securities and other financial assets" if it is due for collection after one year, in the condensed consolidated statement of financial position.

Other operating revenues comprise primarily revenues from our smart life business and other businesses, including "Mobile Device Protection Service," "dmarket" and credit services.

12. Income from arbitration award

In accordance with a binding arbitration award from the London Court of International Arbitration ("LCIA"), DOCOMO received payment of an arbitration award* from Tata Sons Limited ("Tata Sons") on October 31, 2017.

DOCOMO made an investment in Tata Teleservices Limited ("TTSL"), a telecommunication service operator in India in March 2009 and entered into the shareholders agreement ("the Agreement") among TTSL, Tata Sons, and DOCOMO and accounted for the investment under the equity method.

On January 3, 2015, pursuant to the Agreement, DOCOMO submitted a request for an arbitration to the LCIA as to Tata Son's breach regarding execution of an option for sale of stake in TTSL. DOCOMO received a binding arbitration award from the LCIA on June 23, 2016.

As a result of this transaction, DOCOMO recorded the award amount of ¥147,646 million as "Income from arbitration award" on its condensed consolidated statement of profit or loss for the nine months ended December 31, 2017. Concurrent with the receipt of the above award amount, all shares in TTSL held by DOCOMO were transferred to Tata Sons and companies designated by Tata Sons. Upon the transfer to DOCOMO shares in TTSL, DOCOMO discontinued the application of the equity method to the investment in TTSL effective October 31, 2017.

Regarding TTSL, DOCOMO did not record the share of loss on equity method investment and loss on the transfer of investment in an associate in the condensed consolidated statements of profit or loss for the nine months ended December 31, 2017. See Note 15 "First-time adoption (disclosure regarding the transition to IFRS), (5) Notes on difference in recognition and measurement, D. Cumulative translation differences" for additional details.

* The amount received included interest earned and other costs awarded.

13. Fair value measurement

Fair values of financial instruments are determined based on market information such as quoted market prices, and valuation techniques including the market approach, income approach and cost approach. Inputs used for the fair value measurement are classified into the following three levels.

- Level 1: quoted prices in active markets
- Level 2: inputs other than quoted prices included in Level 1 that are observable either directly or indirectly
- Level 3: unobservable inputs

Transfers between the levels of fair value hierarchy are recognized to have occurred at each quarter end.

Regarding the information as at the transition date and the end of the previous fiscal year, financial assets and liabilities applicable under IFRS 9 are stated in accordance with U.S. GAAP, based on the exemptions under IFRS 7 and IFRS 9 based on IFRS 1.

The carrying amounts and fair values of financial instruments, and their associated levels of fair value hierarchy, as of April 1, 2017, March 31, 2018 and December 31, 2018 are as follows. If the carrying amounts of financial assets or financial liabilities not measured at fair value are a reliable approximation of their fair values, information concerning the fair values of such items is not included in the following tables.

Transition date (April 1, 2017)

1. No significant transfer between levels occurred during the nine months ended December 31, 2018.
2. With respect to financial instruments categorized within Level 3, no significant changes in fair value are expected when any of the unobservable inputs used in the measurement are changed to reasonably possible alternative assumptions.
3. With respect to financial instruments categorized within Level 3, no reconciliation is stated since there was no significant change in the financial instruments during the nine months ended December 31, 2018.

The fair values of financial assets and financial liabilities are determined by the following method. In estimating the fair values of financial instruments, market prices are used where available. If market prices are not available, the fair values of financial instruments are estimated by discounting their future cash flows, or by other appropriate methods.

“Cash and cash equivalents,” “trade and other receivables,” and “trade and other payables”

Short-term receivables held for sale and trade receivables measured at fair value are categorized within Level 2, and their fair values are determined by discounting, using a LIBOR-based discount rate, their future cash flows estimated taking into account factors such as the probability of default and loss rates of similar receivables.

“Other financial assets (current)” and “securities and other financial assets (non-current)”

Other financial assets include marketable securities and investments in shares of common stock and bonds issued by unlisted non-equity-method associates.

The fair values of marketable securities are measured at the quoted market prices of identical assets in active markets.

For unlisted common shares without quoted market prices, fair value is not estimated at the transition date or the end of the previous fiscal year. In the nine months ended December 31, 2018, however, unlisted common shares are measured at fair value, using the evaluation model based on discounted future cash flows, revenues, profitability and net assets, along with the evaluation methods including the peer comparison method.

Derivative instruments comprise interest rate swap agreements, foreign currency option contracts and foreign exchange forward contracts, and their fair values are evaluated based on observable market data. The valuation of these derivatives is periodically verified using observable market data, such as exchange rates.

Long-term receivables held for sale and trade receivables measured at fair value are categorized within Level 2, and their fair values are determined by discounting, using a LIBOR-based discount rate, their future cash flows estimated taking into account factors such as the probability of default and loss rates of similar receivables.

“Short-term borrowings” and “long-term debt including current portion”

The fair values of short-term borrowings and long-term debt including current portion are estimated based on discounted future cash flows calculated using an interest rate that will be applicable when similar debt is obtained.

Their fair values are evaluated and verified based on observable market data, and categorized within Level 2.

“Other financial liabilities (current)” and “other financial liabilities (non-current)”

Derivative instruments comprise interest rate swaps, foreign currency option contracts and foreign exchange forward contracts. Their fair values are evaluated based on observable market data and categorized within Level 2. The valuation of such derivatives is periodically verified using observable market data, such as exchange rates.

The fair values of other financial liabilities that do not mature within a short period are determined by discounting their estimated future cash flows, using an interest rate that will be applicable when debt with the same residual period under the same terms is obtained by a consolidated company.

Quantitative information regarding assets categorized within Level 3

Quantitative information at the end of the third quarter ended December 31, 2018 regarding the assets measured at fair value using significant unobservable inputs, on a recurring basis, is as follows. The amounts of the assets categorized within Level 3 are not material at the transition date and the end of the previous fiscal year.

December 31, 2018

Classification	Fair value (Millions of yen)	Valuation technique	Significant unobservable input	Input value
Securities and other financial assets (Unlisted shares)	39,123	Peer comparison method	EV/EBITDA ratio	6 to 8
			Price-to-book ratio	1 to 3

Significant unobservable inputs used for measuring fair value of unlisted shares are mainly discount rate and EV/EBITDA ratio.

The personnel responsible in the Accounts and Finance Group of the Company conducts, subject to internal regulations, the fair value measurement, using valuation techniques and inputs that can most appropriately reflect the nature, characteristics and risks of the financial instruments subject to the fair value measurement. For financial instruments requiring the fair value measurement that involves high-level knowledge and experience, and whose monetary values are material, external experts for valuation are hired for the purpose of the fair value measurement. The analysis of changes in the fair value is reviewed and approved by the manager of the responsible department, after which the results of the fair value measurement of financial instruments, including results of the evaluation by the external experts, are reported to the Board of Directors of the Company.

14. Events after the reporting period

NTT DOCOMO, INC. repurchased its common stock on January 7, 2019. Related information is disclosed in “Note 9 Equity and other equity items.”

15. First-time adoption (disclosure regarding the transition to IFRS)

DOCOMO has prepared its condensed consolidated financial statements in accordance with IFRS from the first quarter ended June 30, 2018. The most recent consolidated financial statements prepared in accordance with U.S. GAAP covered the fiscal year ended March 31, 2018, and the date of transition to IFRS from U.S. GAAP was April 1, 2017.

(1) Exemptions under IFRS 1

A first-time adopter of IFRS is, in principle, required to retrospectively apply each IFRS standard effective at the end of its first IFRS reporting period. However, IFRS 1 provides two types of exceptions to this principle, those subject to mandatory application of the exemptions and those subject to voluntary application. The effects of applying these exemptions are adjusted to retained earnings or other components of equity on the transition date.

The exemptions voluntarily applied by DOCOMO are as follows.

• Business combinations

Under IFRS 1, an entity may elect not to apply IFRS 3 “Business Combinations” retrospectively to business combinations that occurred before the transition date.

DOCOMO has elected not to apply IFRS 3 retrospectively to the business combinations that occurred prior to April 1, 2002. Thus, the amount of goodwill associated with the business combinations that occurred prior to April 1, 2002 was recognized at the carrying amount based on U.S. GAAP. Such goodwill is tested for impairment on the transition date, regardless of whether there is any indication of impairment.

• Deemed cost

Under IFRS 1, an entity may elect to use the fair value of an item of property, plant and equipment at the transition date as the deemed cost on that date. Thus, with respect to some items of property, plant and equipment, DOCOMO uses their fair value at the transition date as their deemed cost on that date.

• Foreign exchange translation differences

Under IFRS 1, an entity may elect to deem the cumulative translation differences to be zero at the transition date. DOCOMO has elected to deem the cumulative translation differences to be zero at the transition date, which are recognized in retained earnings.

• Revenue

Under IFRS 1, an entity may apply the transitional provisions under paragraph C5 of IFRS 15 “Revenue from Contracts with Customers.” DOCOMO has retrospectively applied IFRS 15 through the practical expedient set out in (d) under paragraph C5 of IFRS 15, and thus has not disclosed the amount of consideration allocated to the remaining performance obligations or the timing when DOCOMO expects to recognize such amount as revenue, for all reporting periods prior to the beginning of the first IFRS reporting period (the first quarter ended June 30, 2018).

• Exemption from restatement of comparative information by the application of IFRS 9

If a first-time adopter’s first IFRS reporting period begins before January 1, 2019 and the first-time adopter applies IFRS 9 (2014 version), IFRS 1 permits the entity to apply previously adopted accounting standards, instead of restating comparative information concerning the items within the scope of IFRS 9 as required under IFRS 7 and IFRS 9.

DOCOMO recognizes and measures the items within the scope of IFRS 9 in the consolidated financial statements of the comparative periods in accordance with U.S. GAAP.

(2) Mandatory exceptions to the retroactive application under IFRS 1

IFRS 1 prohibits retroactive applications of IFRS to some items including “estimates,” “derecognition of financial assets and financial liabilities,” “hedge accounting,” “noncontrolling interests” and “classification and measurement of financial assets.” DOCOMO applies these items prospectively from the transition date (from April 1, 2018 as to the items included in the scope of IFRS 9).

(3) Reconciliations

Reconciliations based on IFRS 1 are as follows. In these reconciliations, the amounts under “Reclassification” include adjustments that affect neither retained earnings nor comprehensive income, while the amounts under “Difference in recognition and measurement” include adjustments that affect retained earnings and comprehensive income.

Reconciliation of equity on the transition date (April 1, 2017)

(4) Notes on reclassification

a. Separate presentation of financial assets and financial liabilities

Under IFRS, other financial assets and other financial liabilities are presented separately pursuant to its presentation rules.

b. Presentation of operating expenses

Whereas “operating expenses” were presented based on the cost function method under U.S. GAAP, they are presented based on the nature of expense method under IFRS.

(5) Notes on difference in recognition and measurement

Major items involved in reconciliation of retained earnings are as follows.

	Millions of yen		
	Transition date (April 1, 2017)	December 31, 2017	March 31, 2018

Profit before taxes under IFRS	¥ 1,020,605	¥ 445,302	¥ 1,141,690

A. Business combinations and equity method investments

Additional acquisition of noncontrolling equity interests in a subsidiary that occurred prior to March 31, 2009 was accounted for using the acquisition method under U.S. GAAP. Under the acquisition method, the acquisition cost was allocated to identifiable assets acquired and liabilities assumed, which were measured based on the estimated fair value, with the excess of the acquisition cost over the net assets acquired recognized as goodwill. Under IFRS, changes in a parent's ownership interest in a subsidiary that do not result in a loss of the parent's control over the subsidiary are accounted for as capital transactions.

In addition, under U.S. GAAP, when an investment became an equity-accounted investee in stages, the previously held interest was accounted for using the equity method retroactively. Under IFRS, when an investment became an equity-accounted investee in stages, it was initially measured as the sum of the consideration paid for the additional interest and the fair value of the previously held interest. The equity method did not apply retrospectively to the previous interests.

Moreover, under U.S. GAAP, noncontrolling interests in an acquiree are measured at fair value at the time of business combination. Under IFRS, DOCOMO can select on a transaction-by-transaction basis to measure the noncontrolling interests in an acquiree either at fair value, or at the proportionate share in the identifiable net assets of the acquiree.

The impact of this change is as follows.

	Millions of yen		
	Transition date (April 1, 2017)	December 31, 2017	March 31, 2018
(Consolidated statement of financial position)			
Goodwill	¥ (127,883)	¥ (127,883)	¥ (127,883)
Investments accounted for using the equity method	2,250	2,250	2,250
Deferred tax assets	(18,238)	(18,238)	(18,238)
Additional paid-in capital	156,523	156,523	156,523
Other components of equity	(1,097)	(1,097)	(1,097)
Adjustment to retained earnings	¥ 11,555	¥ 11,555	¥ 11,555

B. Property, plant and equipment, and intangible assets

With respect to some items of property, plant and equipment, DOCOMO applies the voluntary exemption that allows the use of the assets' fair values as of the date of transition to IFRS, as the deemed costs. As of the date of transition to IFRS, the previous carrying amount of those property, plant and equipment measured at deemed costs was ¥87,577 million, while the fair value of those assets was ¥42,518 million.

Borrowing costs directly attributable to the acquisition, construction or production of property, plant and equipment and intangible assets were capitalized as assets under U.S. GAAP. Only those of which, that are associated with those assets that meet qualifying assets under IFRS were capitalized.

Furthermore, part of research and development expenditures that were expensed under U.S. GAAP are recognized as assets in the condensed consolidated statement of financial position as they meet the criteria for capitalization under IFRS, and amortized by the straight line method over their estimated useful lives.

The impact of this change is as follows.

	Millions of yen					
	Transition date (April 1, 2017)		December 31, 2017		March 31, 2018	
(Consolidated statement of financial position)						
Property, plant and equipment	¥	(48,068)	¥	(48,002)	¥	(48,237)

Finance costs		(1,865)		(693)		(2,553)
Adjustment to profit before tax	¥	747	¥	12	¥	718

C. Employee benefits

Under U.S. GAAP, service cost, interest cost and expected return on plan assets associated with post-retirement benefits under the defined benefit plans were recognized as profit or loss. Actuarial gain or loss and past service cost arising from the defined benefit plans were recognized in other comprehensive income, and then they were recognized in profit or loss as components of net periodic pension cost over a certain future period.

Under IFRS, on the other hand, current service cost and past service cost under the defined benefit plans are recognized as profit or loss, while net interest cost is recognized in profit or loss at an amount calculated by multiplying the net defined benefit liabilities (assets) by discount rates. Remeasurement of the net defined benefit liabilities (assets) is recognized as other comprehensive income, which, upon its occurrence, is transferred directly from other components of equity to retained earnings, without going through profit or loss. Remeasurement comprises actuarial gains (losses) associated with the defined benefit obligations and returns associated with plan assets(excluding interest incomes associated with plan assets).

The impact of this change is as follows.

	Millions of yen		
	Transition date (April 1, 2017)	December 31, 2017	March 31, 2018
(Consolidated statement of financial position)			
Deferred tax assets	¥ 1,496	¥ 1,680	¥ 1,306
Other non-current assets	—	(214)	—
Defined benefit liabilities	(4,765)	(5,135)	(4,161)
Other components of equity	(37,946)	(36,817)	(36,186)
Adjustment to retained earnings	¥ (41,215)	¥ (40,486)	¥ (39,040)

	Millions of yen		
	Nine months ended December 31, 2017 (April 1, 2017 – December 31, 2017)	Three months ended December 31, 2017 (October 1, 2017 – December 31, 2017)	Fiscal year ended March 31, 2018 (April 1, 2017 – March 31, 2018)
(Consolidated statement of profit or loss)			
Personnel expenses	¥ 1,078	¥ 387	¥ 1,382
Adjustment to profit before taxes	¥ 1,078	¥ 387	¥ 1,382

D. Cumulative translation differences

On the application of IFRS, DOCOMO has applied the exemption under IFRS 1 regarding the cumulative translation differences, and thereby elected to deem the cumulative translation differences to be zero at the transition date and, are recognized in retained earnings.

As a result, the cumulative foreign currency translation differences of ¥18,148 million as part of other components of equity at the transition date were wholly transferred to “retained earnings.”

In addition, DOCOMO received an arbitration award from Tata Sons Limited (“Tata Sons”) on October 31, 2017, while transferring, at the same time, all of the shares in Tata Teleservices Limited (“TTSL”) held by DOCOMO to Tata Sons as well as a company designated by Tata Sons. Upon the aforementioned share transfer, DOCOMO discontinued applying the equity method. DOCOMO recorded, pursuant to U.S. GAAP, equity in net losses of affiliates of ¥15,383 million in the consolidated statements of income for the nine months ended December 31, 2017, and for the fiscal year ended March 31, 2018, respectively, prior to the share transfer, and loss on the transfer of investment in an affiliate of ¥29,841 million associated with the reclassification adjustments of foreign currency translation adjustment in other income (expense) included in “Other, net” on the consolidated statements of income for the three months ended December 31, 2017, the nine months ended December 31, 2017 and the fiscal year ended March 31, 2018. Under IFRS, however, since DOCOMO has elected to deem the cumulative translation differences to be zero at the transition date, no share of profit (loss) on equity method investments and the loss on the transfer of investment in TTSL has arisen under equity method accounting.

E. Revenue

Under U.S. GAAP, costs to obtain and fulfill a contract in the telecommunications business were capitalized to the extent of the related non-recurring upfront activation fees incurred and amortized over the average expected period of subscription. Under IFRS, however, such costs are capitalized with no limit to the extent that meets the criteria for capitalization. As a result, some sales commission and other charges, which were expensed under U.S. GAAP, are additionally capitalized. The points that are granted to customers commensurate with the usage of services provided by DOCOMO, were recognized as provisions under U.S. GAAP. Under IFRS, however, part of the consideration for the services is recognized as contract liabilities when the points are granted to customers, and the revenue is recognized at the time when the points are used.

Non-recurring upfront activation fee in the telecommunications business was deferred, and was recognized as revenue by type of service over the average expected period of subscription under U.S. GAAP. Under IFRS, non-recurring upfront activation fee received in return for material rights renewals is deferred as a "contract liability" in the condensed consolidated statement of financial position and is recognized as revenue over a period during which DOCOMO provides customers with material rights.

.

F. Levies

Under U.S. GAAP, expenditure of levies such as real estate tax was expensed over the relevant accounting period. Under IFRS, however, the amount of the expenditure is recognized as an expense in full at the time when payment obligation arises.

The impact of this change is as follows.

	Millions of yen		
	Transition date (April 1, 2017)	December 31, 2017	March 31, 2018
(Consolidated statement of financial position)

Adjustment to profit before taxes	¥ 22,700	¥ 7,670	¥ 1,046

G. Associates

Under U.S. GAAP, deferred tax liabilities recognized for taxable temporary differences associated with investment in associates were measured based on the future reversal of the taxable temporary differences resulting from the sale of investments, whereas under IFRS, those are measured based on the most likely manner of future reversal, such as the distribution of dividends.

In addition, as the equity-accounted associates adopted IFRS 15, the equity of those associates is modified as a result.

The impact of this change is as follows.

	Millions of yen

(Consolidated statement of profit or loss)			
Share of profits (losses) on equity method investments	¥ 738	¥ 586	¥ 1,253
Adjustment to profit before taxes	¥ 738	¥ 586	¥ 1,253

(6) Significant adjustment to the consolidated statement of cash flows

1) Nine months ended December 31, 2017

Under IFRS, net cash provided by operating activities decreased by ¥17,225 million, net cash used in investing activities decreased by ¥14,042 million, and net cash used in financing activities decreased by ¥2,872 million compared with the condensed consolidated statements of cash flows prepared under U.S. GAAP.

These changes were mainly due to the change in classification of receivables associated with finance services. Under IFRS, these receivables are classified in operating activities while they were classified in investing activities under U.S. GAAP.

2) Fiscal year ended March 31, 2018

Under IFRS, net cash provided by operating activities decreased by ¥12,940 million, net cash used in investing activities decreased by ¥12,840 million, and net cash used in financing activities increased by ¥362 million compared with the consolidated statements of cash flows prepared under U.S. GAAP.

These changes were mainly due to the same reason as nine months ended December 31, 2017.

2. Others

On October 31, 2018, the Board of Directors declared interim cash dividends of ¥197,625 million or ¥55 per share, payable to shareholders of record as of September 30, 2018 as below.

Total interim cash dividends (millions of yen)	197,625
Cash interim dividends per share (yen)	55
Date of payment	November 22, 2018

Independent Auditor's Report on Review of Condensed Quarterly Consolidated Financial Statements

February 7, 2019

We have reviewed the accompanying condensed consolidated financial statements of NTT DOCOMO , INC. and its consolidated subsidiaries provided in the "Financial Information" section in the Company's Quarterly Securities Report, which comprise the condensed consolidated statement of financial position as at December 31, 2018, the condensed consolidated statements of profit or loss, comprehensive income, changes in equity and cash flows for the three and nine month periods then ended, and notes to the condensed consolidated financial statements, in accordance with Article 193-2, Paragraph1 of the Financial Instruments and Exchange Act of Japan.

Management's Responsibility for the Condensed Quarterly Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these condensed consolidated financial statements in accordance with IAS 34 "Interim Financial Reporting" pursuant to the Article 93 of the Ordinance on Terminology, Forms and Preparation Methods of Quarterly Consolidated Financial Statements, and for such internal control as management determines is necessary to enable the preparation of condensed consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to independently express a conclusion on these condensed consolidated financial statements based on our review. We conducted our review in accordance with quarterly review standards generally accepted in Japan.

A review of condensed quarterly consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in Japan and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated financial statements do not present fairly, in all material respects, the financial position of NTT DOCOMO, INC. and its consolidated subsidiaries as at December 31, 2018, their financial performance for the three and nine month periods then ended and cash flows for the nine month period then ended, in accordance with IAS 34 "Interim Financial Reporting".

Other Matter

We have no interest in the Company which should be disclosed pursuant to the provisions of the Certified Public Accountants Act of Japan.

Notes to the Reader of Independent Auditor's Report on Review of Condensed Quarterly Consolidated Financial Statements:

The Independent Auditor's Report on Review of Condensed Quarterly Consolidated Financial Statements herein is the English translation of the Independent Auditor's Report on Review of Condensed Quarterly Consolidated Financial Statements as required by the Financial Instruments and Exchange Act of Japan.
